MR. CHARLES KILLGORE:

Dear Sir—Some months ago I received from you a sample of tablets labeled "*Cascara Comp.*" [Tonic
Laxative], which I have used with excellent success. Will you please inform me whether the enclosed
sample is the same tablet in a new form? They do not look alike, nor do they answer the same purpose,
my patient getting absolutely no action from these, while those that I gave her from my sample acted
gently and naturally. I enclose copy of my prescription, and would like to know if my patient received
tablets I wrote for. Hoping to hear from you as soon as convenient, I am,

OFFICE HOURS:
8 TO 10 A. M. 1 TO 3 P. M. 7 TO 9 P. M.

I beg to call your attention to my address and to offer my professional services. To such as apply I promise intelligent and careful treatment.

I am a regular graduate in Medicine of almost 20 years standing; the Institution of which I am a graduate is among the oldest and most honored in the land, and my experience has been varied and ample.

I feel warranted by my success in the past, in promising to all, benefit, and in very many cases, positive and lasting cures. All consultations are strictly private and confidential and my fees are fairly moderate.

This locality is exceptionally healthful.

The correspondence of physicians who have patients, needing a change of climate, is respectfully solicited.

Iodine the Favorite Alterative

But in the usual forms iodide of potassium or other alkaline iodides) it is very unpleasant to take, is exceedingly irritating, deranges the digestion and frequently does more incidental harm than good.

There is a form, however, in which this most useful and powerful drug can be administered in which we derive all of its therapeutic properties and avoid all of the disadvantages of the usual preparations:

Hostelley's Syrup Hydriodic Acid.

An *Elegant, Palatable, Non-Irritating* and yet *Thoroughly Effective* form of iodine that is rapidly gaining popularity among the profession. It is regularly prescribed by over 600 physicians in Philadelphia alone. Needs only to be known to be appreciated. You ought to make its acquaintance. Do so *now*. Read sample "offers" below.

INDICATIONS: Strumous conditions, Asthma, Chronic Bronchitis, Psoriasis, Catarrhal conditions, Sciatica, Lead Poisoning, Hay Fever, Spinal Sclerosis, Glandular Enlargements, Syphilis, Rheumatism, Adenitis and all conditions wherein Iodine is used with advantage.

Delicate Women and children take it with Perfect Freedom.

Clinical Lecturer on
Diseases of Children,

lege; Physician to Jef-
ferson College Hos-
pital, No. 1611 Race
St., Philadelphia.
* I use it in almost all cases
requiring iodine treatment,
and have none but words of
praise for the remedy.

Hostelley's Comp. Syrup Hypophosphites

A MOST POWERFUL RECONSTRUCTIVE.

Will not cloy the stomach; will not deposit. The vehicle is a combination of glycerine and beet sugar. Is the richest of all in combined salts. Is termed by its medical friends "The Best of the Best." It hews its own path to confidence. Try it.

AT THE NATIONAL CAPITAL

ALL PHYSICIANS PRESCRIBE

Terraline—a purified and tasteless preparation of Petroleum for internal use—a substitute for Cod Liver Oil and its Emulsions. It is not a patent medicine in any sense of the word, but is sold entirely on the prescription of physicians.

TERRALINE

IN

**CAPILLARY
BRONCHITIS
PHTHISIS
PULMONALIS**

**BRONCHIAL
CATARRH**

LA GRIPPE

CROUP

**GENERAL
ANAEMIA**

It stands to-day without a peer in the treatment of all inflammatory conditions of the respiratory tract.

Administered in dessertspoonful doses, it modifies the cough, increases the expectoration, and generally improves the patient.

Terraline is superior to Cod Liver Oil. It does not simply palliate the cough, but allays the pulmonary irritation, improves the digestive and assimilative powers, and exerts a deleterious effect on micro-organisms.

It produces the most positive results, and can be administered indefinitely to the weakest stomachs without creating a repugnance to its use.

Its effects are especially gratifying in the depressed condition following an attack of La Grippe.

In the croupy coughs of children, and in Croup itself, it is prescribed with the greatest benefit.

A physician writes that in a case of General Anæmia in an excessively chlorotic girl, the improvement was soon marked and progressive. She used Terraline three months and gained in weight five and one-half pounds each month.

It is a reconstructive and tissue-builder of great power. DR. CHAS. H. STOWELL, Editor of *The National Medical Review*, formerly Professor of Physiology and Microscopy at University of Michigan, experimented on the lower animals and proved that Terraline is thoroughly emulsified by the digestive juices, and is absorbed without the possibility of a doubt.

Any "Terraline" or preparation of similar name, is an imitation if manufactured at any place but Washington, D. C.

We will send a dollar bottle, free, to any physician who will pay express charges of 25 cts.

MANUFACTURED ONLY BY

BLUE LABEL SPECIFIC A SURE CURE FOR RHEUMATISM.

TESTIMONIALS.

From ADDISON ELY, Esq., Counsellor-at-Law, Rutherford, N. J.:

I used **BLUE LABEL SPECIFIC** for Rheumatism, and was promptly cured. I have recommended it to others, who, without exception, have found immediate relief and speedy return to health.

From MR. J. E. WILLIAMS, for 35 years in charge of a Department in a leading Wholesale Drug House in New York City:

I suffered with Rheumatism, and tried several different cures, and found no relief until a bottle of **BLUE LABEL SPECIFIC** for Rheumatism gave me immediate relief, and I advise all who have any Rheumatic trouble to try it at once.

From JAMES W. MILLER, Attorney-at-Law, Master in Chancery, Rutherford, N. J.:

The remedy took effect immediately and removed all traces of the Rheumatism.

From C. T. ARTHUR, Brooklyn:

I consider it a wonderful medicine, and always have a bottle of it on hand in case of necessity.

HEALTH REST

The Jackson Sanatorium, AT DANVILLE, NEW YORK.

(Long known as "Our Home on the Hillside.") ESTABLISHED IN 1858.

OFFERS an unequaled combination of natural advantages, therapeutic appliances and favorable conditions for the sick and exhausted. It comprises a magnificent main building and twelve cottages, situated in a woodland park on the eastern mountain slope overlooking the attractive valley, town and beautiful hills beyond. Location unsurpassed for scenery, healthful climate, pure air and water. Malaria utterly unknown.

The Main Building, 300 feet long and absolutely Fire Proof.

is designed to meet every need of the invalid, or seeker of rest and quiet, and is complete in sanitary details. It has light, airy rooms; safety elevator; electric bells throughout; perfect sewerage; extensive apartments for treatment arranged to secure individual privacy; all forms of baths, electricity, massage, etc., scientifically administered—Dr. Taylor's Swedish Movements. The Sanatorium is under personal care and management of a permanent staff of experienced physicians, all graduates of leading regular schools in America. Skilled attendants administer to every need. Here is found comfort without care, and freedom from the taxations of fashionable life, with the helpful influences of a well-ordered Christian home. Culinary Department under the supervision of Mrs. Emma P. Ewing, Superintendent of Chautauqua Cooking School, and leading teacher of scientific and hygienic cookery in the United States. □

"The skill of the physicians and nurses has the successful history of years for its endorsement. The religious character of the life in the hillside home is unmistakable.

THE ORIGINAL RAW FOOD EXTRACT.

(Introduced to the Medical Profession in 1878.)

A CONDENSED FOOD.

The Vital Principles of Beef Concentrated, Containing Twenty Per Cent. of Coagulable Albumen.

PALATABLE! NUTRITIOUS! PERMANENT! ECONOMICAL!

BOVININE was introduced to the Medical Profession nearly eighteen years ago, and stands today far in advance of all other meat preparations as a FOOD. Actual results from its use by thousands who are prescribing it, likewise the ready and unqualified endorsement it receives, prove **BOVININE** to be the most valuable nutrient extant. It only needs a careful trial to convince any member of the Profession of its superior merits as a TRUE NUTRIENT, and one that can be relied upon in the most critical conditions.

BOVININE, containing as it does all the nutrient properties of lean raw beef in a highly concentrated form, is invaluable in all conditions of mal-nutrition or mal-assimilation, convalescence, irritation or ulceration of the intestinal tract, in chronic or exhausting diseases, in supporting treatment, in the puerperal state, in severe sea-sickness, and in cases of alcoholism and the opium habit.

THE BOVININE CO., 495 W Broadway, New York City.

ALPHA AND THE OMEGA CONTINUOUS FLOW SYRINGES.

ALL HARD RUBBER PIPES AND FITTINGS.

Dates of United States Patents granted on "Alpha" Rubber Goods: June 9, 1885; April 13, 1886; May 11, 1886; May 18, 1886; Nov. 16, 1886; Dec. 21, 1886; Jan. 4, 1887; Jan. 25, 1887; May 10, 1887; May 22, 1888; Feb. 5, 1889.

ADVANTAGES.

The "ALPHA" and the "OMEGA" SYRINGES are perfectly simple in construction.

They have no more parts than the old style or ordinary Syringes.

They entirely obviate the intermittent, and, in many cases, painful action of Pump Syringes.

They absolutely prevent the admission and consequent dangerous injection of air, so common with all intermittent or old style Syringes.

Unlike all Fountain, Rubber Bag or Pump Syringes, the flow is not only continuous, but can be made either Gentle or Strong at the will of the user, the pressure of the thumb and forefinger being sufficient to produce a full stream.

The Steady Flow can be increased, lessened or stopped at will.

The Continuous Flow of the injecting fluid through the nozzle while the Syringe is in use, prevents the fecalized fluids from being drawn back into the rubber bulb and tube, which often happens in the use of intermittent Syringes, rendering them offensive.

Please note that the improved action of these Syringes is obtained by simply corrugating or flattening the usual round rubber outlet tubes of ordinary Syringes. Therefore, they have NO CLYDE AIR CHAMBERS or other complications to get out of order.

The Alpha Syringes have received the indorsement and praise of the highest medical authorities as being the safest and easiest Syringe known for invalids to operate—never tiring the hand, perfect in cleanliness, durability and efficiency.

D. H. TAYLOR, M. D.,
MEDICAL DIRECTOR AND GEN. MANAGER.

THIS Sanitarium is finely located at Martins Ferry, Ohio, in a beautiful tract of land, near Wheeling, W. Virginia, at the terminus of street car lines, and is fully equipped to successfully treat Liquor, Morphia, Chloral and Cocaine Habits, also Neu-raesthesia.

This institution is based on the modern view that inebriety is a disease and curable. Each case receives the individual care of the physician and from scientific principles.

The rooms are all large and well ventilated and lighted, and arranged for comfort, so that each case can have every possible advantage with quiet and privacy of a home.

The treatment comprises the use of every means which science and experience have found to be of value in building up the brain and nervous system, and includes baths and other remedies.

PERMANENT CURE ABSOLUTELY GUARANTEED those who will earnestly use all the means provided. Special care is adapted to the needs of each case. Every patient is under the direct care of an attendant and physician.

Members of the profession who may commend their patients to our care will be remunerated for same and can be assured of the most skillful management and most exacting professional courtesy.

TERMS REASONABLE.

THE HOME GYMNASIUM

The Gymnasium as shown in the cut, the right with the lounge up, and the left, lounge down, represents a combination of pulley weights in one handsome piece of furniture covering the space of a double bedstead.

This apparatus is constructed to fill the wants of Hospitals, Sanitariums, Doctors' Offices, Colleges, Private Schools and Private Houses, not only to answer in the treatment of various ailments, but also to equalize and assist the functions of our system in health by a daily course of moderate exercise at home.

The Following Endorsements are Given:

PHILADELPHIA, PA.
DEAR SIR—Your Home Gymnasium Apparatus combines simplicity with thorough effectiveness for the development and training of the muscular system, and withal has the merit of cheapness.

Yours truly,

PROF. D. HAYES AGNEW, 1611 Chestnut Street.

PHILADELPHIA, PA.
MY DEAR SIR—I have examined your Home Gymnasium, and am very much pleased with it. It seems to me to give full opportunity for the exercise and development of all the muscles of the body, and I am sure that its rational use cannot fail to be of benefit to any one who will try it.

Very respectfully,

WM. PORTER, M. D., 1223 Spruce Street.

PHILADELPHIA, PA.
Dear Sir:—I have examined your Home Gymnasium Apparatus, and it appears to me entirely satisfactory. It seems to me to meet the objects for which it is intended, and to afford opportunity for the development of all of the muscles of the body.

Yours truly,

H. C. WOOD, M. D., 1925 Chestnut Street.

In addition to the Gymnasium proper, which is for active exercise, M. Ruebsam has invented

"The Muscle Beater,"

which is intended to furnish the passive part of the movement treatment. By the use of the Muscle Beaters every person may be their own manipulator, and with a small expense, remove any obstruction and prevent serious trouble.

I also give a few Endorsements as follows:

PHILADELPHIA, Nov. 5, 1886.
MR. JOHN E. RUEBSAM, DEAR SIR—I am in the habit of prescribing your Muscle Beaters in suitable cases, and with excellent success. It is an important adjunct in massage treatment.

Yours respectfully,

PROF. D. HAYES AGNEW.

NEW YORK, January 12, 1887.
MR. JOHN E. RUEBSAM, DEAR SIR—I have recommended your Muscle Beaters to several of my patients. I consider them an ingenious and very valuable addition to the list of therapeutic agents for the treatment of Atrophy and Paralysis.

Yours respectfully,

ALLEN McLANE HAMILTON, M. D.

DR. CHARLES K. MILLS, of Philadelphia, Pa., in his book on the Nursing and Care of the Nervous and the Insane, recently published by J. B. Lippincott & Co., refers to and commends the use of the Muscle Beater (Page 56).

The April number, 1887, of the Therapeutic Gazette, of Detroit, in an article (page 247) headed "A Substitute for Massage," recommends the Muscle Beater strongly as a well-deserving substitute for the hands of a manipulator, to be used daily by the patient under the advice of the attending physician, or as an assistant to and between treatment to the professional operator in all cases where Massage is advisable.

What the Chemists have to say of Takoma Water.

From a report of qualitative analysis made by F. W. Clarke, chief chemist of the Geological Survey, we quote the following: "The total solid contents, 20.4 parts per million, are extremely low. The water contains practically no sediment."

From report of analysis made by Ricketts & Banks, metallurgists, chemists and mining engineers, 104 John Street, New York, we quote: "Total solids at 240 deg. Fahr., 1.3996 grains per U. S. gallon of 231 cubic inches. Note.—Results entirely satisfactory—water extremely pure."

P. B. Wilson, Professor of Chemistry, Toxicology and Microscopy, Baltimore University, Baltimore, Md., says: "I have examined a sample of water from the Takoma Spring and find that it contains .96 (ninety-six hundredths) of a grain of solids in a Winchester gallon of 231 cubic inches. It contains no organic matters."

We give in full the report of analysis made by Professor E. T. Frisoe, of Columbian University, Washington, D. C.

The REGULAR SESSION will begin October 1st, 1896, and continue seven months. The SYSTEM OF INSTRUCTION is a graded one, and consists of DIDACTIC LECTURES, CLINICAL TEACHING, QUIZZES, RECITATIONS and LABORATORY WORK, so arranged that the work of each year does not conflict with the work of the other two years, the course of study being about equally divided between recitations and lecture work on the one hand, and laboratory work and clinics on the other.

PERSONAL work in the Anatomical, Chemical, Histological, Pathological, Physiological, Dental and Pharmaceutical Laboratories is a prominent and most important feature, and without additional expense.

The VIRGINIA HOSPITAL and its Outdoor Departments, which adjoin the College buildings, together with its Lying-In Dispensaries, furnish ample facilities for genuine clinical instruction, and the Professors of the different Departments are allowed the use of this Hospital as a school of practical instruction.

Tonsillitis.

"In cases of deep *Tonsillitis* there is, fortunately, a remedy, which, if administered at the outset of the attack, will almost always cut short the crescent inflammation. This is *Guaiacum*. I prescribe it as a *lozenge*. Taken in this way it seems to have a local as well as a constitutional effect."

—[MORELL MACKENZIE, M. D.]

THROAT LOZENGES

When properly prepared, a lozenge offers an advantage over other forms of local medication in throat affections by keeping the selected drug in continuous contact with the diseased mucous membrane.

Throat Lozenges [Hancock's] have earned a reputation for purity and standard quality, and they uniformly follow the idea of the lozenge so generally extolled by the late Dr. Morell Mackenzie and verified by many other laryngologists.

Lozenges of Guaiacum and its Combinations.

Troch. Guaiac.—Morell Mackenzie, M. D.	2 grs. Resin Guaiac.
Troch. Guaiac. Comp.—Wm. Pepper, M. D.	{ 2 grs. Resin Guaiac. 1 gr. Iodide Potass.
Troch. Guaiac. and Ammon. Comp.—G. L. Magruder, M. D.	{ 2 grs. Resin Guaiac. 1 gr. Chloride Ammon. 1 gr. Chlorate Potass.
Troch. Guaiac. and Cubeb.	{ 2 grs. Resin Guaiac. ½ gr. Pulv. Cubeb.
Troch. Guaiac. and Benzoic Acid.—J. F. Martenet, M. D.	{ 2 grs. Resin Guaiac. ¼ gr. Benzoic Acid.
Troch. Guaiac. and Tannin	{ 1½ grs. Resin Guaiac. ¼ gr. Tannic Acid.

These Lozenges are made with the original Black Currant Paste, and their palatability induces the patient to retain them in the mouth until thoroughly dissolved, thus giving a prolonged topical action of the drug upon the diseased surface.

INTRODUCTORY.

The fourth volume of R. L. Polk & Co.'s Medical and Surgical Register is herewith presented to the public and will be found to have fully maintained its high standard for accuracy and completeness in every department. The general arrangement of the work conforms to that of previous issues.

The Register contains the names of over 106,000 physicians practicing medicine within the United States and the Territories. Irrespective of pathy, these are conveniently arranged alphabetically by State, and postoffice. Each name is accompanied by all the information obtainable regarding place and time of graduation. In large cities the street and number are given, and in all cases the population of the place. To avoid the enormous bulk that would have resulted from giving the full name of the college, and school of medicine practiced, a convenient and intelligible system of symbols is adopted, which is fully explained in a foot-note on each page. At the commencement of the list for each State and Territory is a good descriptive article, embodying such matters as location, boundaries, extent in miles and acres, latitude and longitude, statistics regarding climate, temperature, population, rate of mortality, number of deaths from consumption, all medical and charitable institutions, medical societies, and the full text of all State laws for regulating the practice of medicine. In addition to this complete directory, the 106,000 names are repeated without addresses, arranged alphabetically, accompanied only by figures, designating the page on which the reader can readily find each name in its appropriate place in the directory proper. This list will prove of great convenience, as it will enable anyone to find the present location and address of any physician in the United States whose name he knows.

Preceding the directory of names are departments prepared with great care, giving full lists of all medical colleges, either existing or extinct, in the United States and Canada, of officers of the medical departments of the United States army, navy, marine hospital service and pension department, and a complete directory of the medical journals of the

United States. All errata and the names of physicians, societies, institutions, etc., received too late for publication in the body of the book, will be found in the appendix, pp. 2327-2351.

In a work of such magnitude entailing the compilation and printing of the mass of figures and letters embodied in the book, it will be at once apparent that unavoidable errors may have crept in, notwithstanding the great care exercised by the publishers. Where the college training of a physician does not appear favorably, all interested persons are requested to apply to the publishers, who will be glad to furnish all available information touching upon the case to the end that possible errors may be explained and no injustice done to the individual.

The publishers desire to thank all those who have assisted them during the compilation of the work, and would refer specially to their obligations to the officers of the different medical colleges who have rendered valuable service in perfecting the contents of this volume; and, in conclusion, would state that it is intended that the publication shall be regularly issued, and in accordance with that intention a fifth edition will appear in due time, in which there will be made such additions and improvements as may be deemed advisable.

NOTE.—Special attention is called to the fact that the symbol, an asterisk (*), meaning "no report received in answer to inquiry regarding graduation," was only used after the most thorough research of the alumni lists of all existing colleges had failed to yield any particulars, and does not at all imply that the physician after whose name it appears is a non-graduate. Numbers are doubtless so designated who are graduates and prominent in their profession, but the publishers found it impossible to secure the desired graduation data before going to press.

FLINT, MICH.

A Hospital for the Treatment of
Nervous and Mental Diseases.

ESTABLISHED IN
1891.

BUILDINGS

modern and free from institutional features; located in a grove of sixty acres of stately oaks; erected with

especial reference to the needs of patients suffering from nervous and mental diseases. Picturesque grounds which have been preserved in their natural beauties afford abundant facilities for recreation. Charming drives in and about Flint for which *carriages are provided without charge*, are

given patients daily. Outdoor sports and indoor amusements are special features. Buildings are of substantial construction, perfectly heated and ventilated and luxuriously furnished. Home comforts and restful surroundings are assured to those seeking relief from disease, and to invalids requiring quiet, healthful influences. Purest water in abundance is supplied from a hillside spring. Milk is furnished by a private herd of well selected cows.

The hospital cuisine is strictly first-class, and effort is constantly made to meet individual tastes and preferences.

NOYES HALL, completed in the spring of 1896, furnishes ideal advantages for indoor amusements. The corridor connecting, provides, above, a hall for dancing and assemblies, below, a bowling alley. In the building proper, there are contained, gymnasium, billiard and card room, ladies' sitting room, lounging and smoking room and library, Turkish bath and electrical room.

The hospital is thoroughly equipped with the latest modern appliances for treatment, including Static, Faradic and Galvanic apparatus and Electric bath. Massage and Electric Massage are intelligently administered.

Flint is a beautiful city of ten thousand inhabitants, located in a prosperous agricultural region of Michigan. It is easily accessible from points east and west, being situated upon the trunk lines, Chicago & Grand Trunk and Flint & Pere Marquette Railways.

Dr. Burr, Medical Director, was for sixteen years connected with the Eastern Michigan Asylum, and for five years superintendent of that institution.

A limited number of patients received. For further particulars, address

DR. C. B. BURR, Medical Director,
FLINT, MICHIGAN.

Fig. 1.

Figure 1 shows the vagina and uterus, and illustrates the Ball Nozzle Syringe in operation.

Figure 2 shows the same parts with the ordinary syringe in operation.

Fig. 2.

AS is well known, a vaginal syringe throwing a straight, piercing stream is out of the question, because of the danger of forcing water into the orifice of the uterus, which often produces what is known as uterine colic. This fact has made it necessary to perforate vaginal syringes at the sides and below the top.

By this method the washing, or flooding, is necessarily below the top of the syringe and cannot reach the parts most important to be washed. The peculiar construction of the Ball Nozzle Syringe overcomes all of the difficulty, as it diffuses an even and gentle conical-shaped film of water from the mouth of the syringe, **REACHING EVERY PART OF THE VAGINAL CAVITY**, cleansing thoroughly the mouth and neck of the womb and the **CUL-DE-SAC**, and removing therefrom every particle of foreign matter, the presence of which is the cause of disease, pain and suffering.

This happy result cannot be obtained with any other syringe. The Ball Nozzle Syringe means more to women than can be told.

THE IMPROVED "YALE" SURGICAL CHAIR,
 Pronounced the "ne plus ultra" by
 the Surgeon, Gynæcologist, Oculist and Aurist. Only Award World's Fair, Oct. 4, '93
 Manufactured exclusively by THE CANTON SURGICAL AND DENTAL CHAIR CO., Canton, Ohio.

Fig I—Normal Position.

Fig IX—Chloroform Narcosis Position.

Fig III—For Examinations.

The "Yale" is the most complete Chair ever offered to the Surgeon, Gynæcologist, Oculist or Aurist. Every position known to the profession is easily and quickly obtained. Has the largest range of movements. Can be firmly locked in any desired position.

Does away with moving patient to get dorsal position. Secures the most desirable inclinations for the Sim's position. Can be raised, lowered, revolved or tilted with patient in position to get the best lights. It is the **STRONGEST AND MOST SUBSTANTIAL CHAIR MADE.**

Fig. V—Semi-Reclining.

IT HAS NO EQUAL

In Range of Movements and Positions and Ease of Adjustment.

IT EMBODIES . . .
 Utility, Beauty,
 Convenience and
 Durability.

Fig. XVII—Dorsal Position.

Each Chair is supplied with the most complete stirrups for Gynæcological practice, also with the **Could Head Rest**, which is universal in its adaptations for the Aurist and Oculist. No other Chair can compare with the "YALE" in completeness, strength, adaptation, convenience and finish. We challenge competition, and solicit an investigation of its merits.

Hundreds sold every year, and every one giving the best of satisfaction is the best evidence that they are not only the **BEST**, but are just as represented. Do not be deceived in buying any other that is "just as good" as the "YALE." It can not be done. We have features in the "YALE" patented to us that no one else can use. Decidedly the **BEST** Chair on the market for the price.

Fig XIX—Trendelenburg Position.

TO THE PROFESSION.

Horlick's Malted Milk

Is a combination of pure, rich cow's milk and an extract of malted grain evaporated to dryness in vacuo. It is a complete food, containing all the elements of nutrition in a soluble and easily digested form.

For Infants,

Deprived of their natural supply, *Malted Milk* is offered as the nearest artificial approach to mother's milk. It is perfectly sterilized, contains no starch, and is prepared by simply adding water, requiring neither cooking nor addition of milk. The casein of the cow's milk is partially predigested by Plant Pepsin obtained from the grain, malted by our special process, thus preventing the formation of hard and irritating curds in the infant's stomach.

For Invalids,

Or those suffering from Typhoid Fever, Pneumonia, Phthisis or other wasting diseases, or from Dyspepsia, Gastritis, and other digestive troubles, no better diet could be found. It is the ideal milk diet, superior to raw milk or beef extracts, easily prepared and acceptable to the weakest stomach. It makes an excellent table drink also, far more healthful and nutritious than tea, coffee or cocoa.

Free Samples of Malted Milk Sent

ARMY MEDICAL MUSEUM AT WASHINGTON, D. C.

The Army Medical Museum was removed in 1887 from the building formerly known as Ford's Theater (Nos. 509 and 511 10th st. n. w.), and now occupies a portion of the new building erected at the north-west corner of 7th and B streets s. w., east of the National Museum. The rest of the building is occupied by the Library of the Surgeon-General's office, a portion of the Record and Pension Division of the War Department and the Laboratory.

The museum was founded, and a large portion of the medical and surgical specimens collected, during the war of the rebellion. Since the close of the war, however, the officers in charge have continued to collect specimens from the medical officers of the army at the several military posts, and a number of valuable specimens have been contributed by physicians engaged in private practice. Specimens of value from private physicians are always gladly received, and thus secure permanent preservation in connection with the names of the donors.

According to the report of the Surgeon-General for the fiscal year, terminating July 1, 1895, the museum contained 32,889 specimens. The collection is open to visitors daily from 9 a. m. to 4 p. m., and was visited last year by more than 52,000 persons. The officer in charge is Lieut.-Col. D. L. Huntington, Deputy Surgeon-General, United States Army.

This collection is richer in specimens illustrative of the results of gunshot wounds, and of the surgical operations which they necessitate, than any other collection in the world. In other departments, though it does not equal some of the wealthy and long-established museums of Europe, its collections are nevertheless by far the most important in America, and are annually increasing in extent and value.

The library of the Surgeon-General's office, which occupies a portion of the same building, is also under the charge of Lieut.-Col. D. L. Huntington, U. S. Army, and is the largest and most valuable medical library in the world. According to the Surgeon-General's report, above referred to, it contains about 117,000 volumes and 193,000 pamphlets, and is steadily increasing. Medical men from any part of the country desirous of consulting the works in this library are courteously welcomed and granted free access.

U. S. NAVAL MUSEUM OF HYGIENE AT WASHINGTON, D. C.

The United States Naval Museum of Hygiene, now located at 23rd and E streets N. W., in the buildings recently vacated by the Naval Observatory, was organized by Congress in an Act making appropriation for its support for the fiscal year ending June 30, 1883.

The plan, briefly described, comprehends a collection that shall be illustrative of the entire range of sanitary science, the establishment of a course of lectures by authoritative sanitarians from all sections of the country, and a library of sanitary science, accessible, under proper restrictions and guarantees, to all who are engaged in the study of this branch of knowledge. The library already numbers many of the standard sanitary works in the English, French and German languages, and is constantly increasing.

The institution is fully equipped with chemical, bacteriological and physiological laboratories, and for the first time in its history has ample space for the proper classification and display of exhibits, now numbering over 2,000 specimens.

Contributions from medical men and sanitarians of the country, of essays, drawings or specimens bearing in any way upon hygiene or sanitary science are respectfully requested, and will be permanently preserved under the names of the donors.

CIRCULAR FOR THE INFORMATION OF PERSONS DESIRING TO ENTER THE MEDICAL CORPS OF THE U. S. NAVY.

A candidate for examination and appointment in the Medical Corps of the Navy must be between 21 and 26 years of age, and must apply to the Honorable Secretary of the Navy for permission to appear before the Naval Medical Examining Board.

The application must be in the handwriting of the applicant, stating age and place of birth, also, the place and State of which he is permanent resident; and must be accompanied by letters or certificates from persons of repute, testifying, from personal knowledge, to his good habits and moral character, and that he is a citizen of the United States.

FORM OF APPLICATION.

_____, 189

Sir: I request permission to be examined for an appointment as Assistant Surgeon in the United States Navy.

I was born at _____, and was _____ years of age on the _____ day of _____, 189—, and am a citizen of the United States, residing in _____, county of _____, in the State of _____.

I enclose herewith certificates as to moral character, habits, and citizenship. Very respectfully,

_____.

The Honorable Secretary of the Navy,
Navy Department, Washington, D. C.

If, in reply to the above, the candidate receive a permit, he will notify the president of the board of the fact, and request him to appoint a time for his examination.

Candidates will be expected to present to the board testimonials of educational and professional fitness.

The board is required, under oath, to report on the physical, mental, moral, and professional qualifications of the candidate, so that the examinations are necessarily rigid and comprehensive, though simple and practical, and not beyond the attainments of any well-educated physician.

A successful candidate, upon the completion of his examination, will be notified by the president of the board that he has been found qualified.

An applicant found "not qualified" may be allowed a second examination after one year, but not a third.

No allowance will be made for the expenses of persons undergoing examination, which, if uninterrupted, is usually completed within a week.

Appointments will be made as vacancies occur, and in the order of merit reported by the board, but a qualified candidate, not appointed within a year, must be re-examined.

The officers of the Medical Staff of the Navy are as follows: Medical Directors, Medical Inspectors, Surgeons, Passed Assistant Surgeons, and Assistant Surgeons.

Vacancies in these grades (by death, or retirement at the age of sixty-

two years) are filled in the order of seniority, and for each step of promotion a physical and professional examination is required by law.

Assistant Surgeons are examined at the expiration of three years' service, and, if successful, become Passed Assistant Surgeons.

ORDER OF EXAMINATION.

1. Physical. 2. Oral. 3. Written. 4. Clinical. 5. Practical.

The physical examination will be very thorough, and the candidate will be required to certify, under oath, that he is free from any mental, physical, or constitutional defects, hereditary taint, or disability of any kind that would be liable to interfere with the efficient performance of duty.

The candidate will be required to address a letter to the board of examiners, stating concisely—

1. The date and place of his birth; the school, institution, or college at which he received his general education; the several branches studied, including his knowledge of general literature, and of the ancient and modern languages; the exact title of the medical school or schools at which he received instruction, and, if an alumnus, the date of his graduation; the name and place of residence of his preceptor, and the time when he commenced the study of medicine; also, the title of the text books studied or read on Chemistry, Anatomy, Physiology, Histology, Materia Medica, Pharmacy, Therapeutics, Pathology, Theory and Practice of Medicine, Microscopy, Principles and Practice of Surgery, Minor Surgery or Mechanical Therapeutics, Medical Jurisprudence, Toxicology, Obstetrics, Hygiene, Quarantine, Biology, and Physics.

2. The opportunities he has had of engaging in the practice of medicine, surgery, and obstetrics, or of receiving clinical instruction; or whether he has or has not been a resident physician or interne in a civil or military hospital.

3. The number of subjects or parts of subjects he has dissected, what opportunity he has had to become familiar with minor surgery and bandaging, chemical and pharmaceutical manipulations, and the physical properties of drugs.

The candidate will append to this letter his name in full, post-office address, and his local address at the date of the examination.

A thesis or short essay must next be written (without reference to notes or books) upon some professional or scientific subject indicated by the board.

Oral Examination.—The candidate will be examined orally upon his literary and scientific acquirements, including General History, Natural Science, Botany, Geology, Zoology, and English Literature, and pro-

professionally upon Anatomy (general, special, and surgical), Histology, Physiology, Theory and Practice of Medicine, Principles and Practice of Surgery, Chemistry, Legal Medicine, Toxicology, Materia Medica, Therapeutics, Pharmacy, Obstetrics and Diseases of Women and Children, Hygiene, Microscopy, and Physics.

Candidates possessing special knowledge of the Higher Mathematics, Astronomy, Literature, Art and Ancient and Modern Languages, will be given full credit for their proficiency.

Written Examination.—Written answers will be required on the following subjects, propounded by the board. Anatomy, Histology, Physiology, Surgery, Theory and Practice of Medicine, Pathology, Obstetrics, Materia Medica and Physiological Action of Drugs, Chemistry, Legal Medicine, Hygiene, Quarantine, Toxicology, Physics, Botany, Geology, Zoology, and General Literature.

The number of questions on any one subject will be determined by the board, according to the estimate made of the knowledge possessed by the candidate of any particular subject, as indicated in the oral examination.

The clinical examination of patients will be made by the candidate at a naval hospital, and will include the use of the Microscope, Thermometer, Laryngoscope, Ophthalmoscope and other aids to physical diagnosis; after which he will be required to submit a written clinical report on one or more medical or surgical cases.

The practical examination will comprise surgical operations on the cadaver, the application of splints, bandages, and surgical dressings, the use of the microscope (for clinical purposes, and the recognition of pathological or other specimens), and chemical and pharmaceutical manipulations.

A candidate may withdraw at any period of the examination, with the consent of the board, and may at a future time present himself for re-examination.

The board may conclude the examination—written, oral, or practical—at any time, and may deviate from this general plan in such manner as it may deem best to insure the interest of the naval service.

H. A. HERBERT,

Secretary of the Navy.

NOTE.—For further information apply to Medical Director Charles H. White, U. S. Navy, President Naval Medical Examining Board, Naval Laboratory and Department of Instruction, Brooklyn, N. Y.

IT IS INCONSISTENT

with good judgment and common sense to make haphazard additions to your library. A little study of the matter, however, renders the solution of the library problem easy. It can be resolved into two propositions. First, shall I spend \$50 to \$100 in text-books, journals, etc., or, second, \$15

for SAJOUS' ANNUAL, a **complete record** of all that is new in medical science, with the **incidental insurance** of having this year's report made authoritative by the able corps of 70 editors. Accuracy and reliability are always expensive. Don't expect something for nothing nor invest in gold bricks. SAJOUS' ANNUAL is standard, authoritative, and complete. Set your mind at rest by having in your library **the complete record** of the year's work, and thus save time, money, and possible embarrassment.

The Bertha Company SKIN AND HAIR SPECIALISTS

406 Park Ave., BALTIMORE.

The principal of The Bertha Co. began her work of tissue building to restore the hair and skin, in 1869, and has proven that her method is the only successful one.

The Company wishes to call the attention of physicians and surgeons to the **QUEEN ANNE CREAM**, a nerve tissue builder. It is a great help and comfort in all kinds of wasting sickness. It supplies lymph, restores expression to the face, builds tissues in injuries, and prevents scarring. Mothers are very grateful to physicians who have hitherto advised the use of **QUEEN ANNE CREAM**.

To ascertain any day of the week in any year of the present century, look in table of years for the year required, and under the months are figures which refer to the corresponding figures at the head of the columns of days. Example: To find what day of the week Sept. 2 fell on in the year 1873. In the table of years look for 1873 and in a parallel line under Sept. is fig. 1, which directs to col. 1, in which it will be seen that Sept. 2 fell on Tuesday.											LEAP YEARS.

Alabama extends from 30 degrees 12 minutes north latitude to 35 degrees north latitude, a distance of 331 miles; and from 84 degrees 55 minutes to 88 degrees 35 minutes west longitude, a distance of 214 miles, and is in the same latitude as Palestine, Northern Africa, Central China and Southern Japan. It is bounded on the east by Georgia, on the south by Florida and the Gulf of Mexico, on the west by Mississippi and on the north by Tennessee, and comprises an area of 50,722 square miles, or 32,462,080 acres. The history of Alabama dates back to the year 1540, when the country was invaded by the Spaniards, under De Soto. The next appearance of Europeans was in 1702. In 1817 the United States created a territory of what is now Alabama, and two years later it was admitted into the Union, being one of the first States added to the original thirteen. Alabama belongs to the great forest region of the continent. Large forests of hickory, poplar, chestnut, oak, mulberry and other deciduous trees still cover the northern portion of the State, while in the south the magnolia, live oak and other sub-tropical evergreens flourish, and the river bottoms are lined with canebrakes and cottonwood trees. The climate is warm and semi-tropical. The northern portion is considerably colder than the southern, which is accounted for more by its greater elevation than from its higher latitude. The mean annual temperature is 62.37 degrees as observed at Auburn, which is situated near the geographical center of the State. The mean annual temperature in the valley of the Tennessee river is 60 degrees, and in the extreme south about 69 degrees. The rainfall of the State is quite noteworthy, averaging 63 inches, which is distributed with tolerable regularity throughout the seasons. The beautiful Tennessee river drains the northern portion of the State. Entering at the northeast, it makes a broad sweep of about 280 miles, and forms for a short distance the northwest boundary, before entering Tennessee on its way to join the Ohio at Paducah, Ky. The mineral resources of Alabama are valuable and of considerable range. Gold is found in the east central part of the State, though not in paying quantities. Magnetic iron, red and brown hematite, ochre and other iron ores are found in Shelby, Benton, Bibb, Jefferson and Tuscaloosa counties. In Talladega and Randolph counties manganese occurs. Black, buff and variegated marbles abound in Shelby and Talladega counties, and rich veins of bituminous coal cover nearly all

the northern part of the State. Its mineral springs are famous for their medicinal properties. The following table shows the increase in population for 70 years:

1820	127,901	1860	964,201
1830	309,527	1870	996,992
1840	590,756	1880	1,262,205
1850	771,623	1890	1,513,017

The educational facilities are excellent, and comprise the University of Alabama, located at Tuscaloosa; the Medical College of Alabama, located at Mobile; the Birmingham Medical College at Birmingham; the Law School, at Montgomery; Spring Hill College (Roman Catholic), at St. Joseph; Howard College (Baptist), at Marion, and the Emerson Institute at Mobile. The constitution provides that a State Board of Education shall establish through the State, in each township or other school district, one or more schools, at which all the children between the ages of 5 and 21 may attend free of charge.

Rate of Mortality in Alabama, as computed from the U. S. Census of 1890:

Population.	Deaths in 1890.	Rate per 1,000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
1,513,017	20,898	13.81	10,307	10,591	12.36	15.60

Total number of deaths from consumption during 1890 was 2,163, which was at the rate of 1.43 per 1,000 of population, or 103.50 per 1,000 total deaths.

MEDICAL LAWS OF ALABAMA.

An Act to Regulate the Practice of Medicine in the State of Alabama.
 Be it enacted by the General Assembly of Alabama:

Section 1. That no person, except those proposing to practice some irregular system of medicine, shall be permitted to practice medicine in any of its branches or departments as a profession and means of livelihood in the State, without having obtained a certificate of qualification from some authorized board of medical examiners as hereinafter provided.

2. That no person shall be permitted to practice any irregular system of medicine in any of its branches or departments as a profession or means of livelihood in this State, without having obtained a diploma or certificate of qualification in anatomy, physiology, chemistry and the mechanism of labor, from some authorized board of medical examiners, as hereinafter provided.

3. That the Board of Censors of the Medical Association of the State of Alabama, organized according to the constitution of the said Medical Association of the State of Alabama, which was adopted at its

annual meeting at the city of Tuscaloosa, in March, 1873, and the boards of censors of the several county medical societies which are in affiliation with the said Medical Association of the State of Alabama, and organized in accordance with the provisions of the constitution just mentioned, be and are hereby constituted the authorized Boards of Medical Examiners referred to in the first section of this act.

4. That the standard of qualifications required of persons desiring to practice medicine in this State, together with the rules for the government of the authorized boards of medical examiners, shall be such as may be determined from time to time by the said Medical Association of the State of Alabama, in accordance with the provisions of its said constitution of 1873.

5. That every diploma or certificate of qualification authorizing any person to practice medicine in this State, which shall be issued by any authorized board of medical examiners, shall be presented to the probate judge of the county in which said person resides, who shall officially endorse the same, and seal it with the seal of the county, and who shall also cause a full and fair copy of the same to be made in a well-bound book to be kept for that purpose, and called the register of licensed practitioners of medicine, and for this service he shall be entitled to a fee of one dollar: Provided, That said Medical Association, nor any board of censors in affiliation with it, shall be allowed to charge any fee for any diploma or certificate of qualification which may be granted by it.

Sec. 7. That all persons who shall be legally engaged in the practice of medicine in any county of this State, before the organization of the board of medical examiners of said county, all persons who at any time have been legally engaged in the practice of medicine in this State, and who are now authorized to practice medicine in this State, shall be entitled to the certificate of the board of medical examiners, and to be inscribed in the register of licensed practitioners of medicine without examination as to qualification.

8. That the provisions of this act shall take effect in any county of this State whenever the board of medical examiners for said county shall have organized, as hereinbefore provided, and the fact of such organization officially communicated to the probate judge of said county by the board of censors of the Medical Association of this State.

9. That none of the provisions of this act shall apply to females who now or may hereafter be engaged in the practice of midwifery: Provided, said females practice no other branch or department of medicine.

10. That all laws and parts of laws in conflict with the provisions of this act, be and the same are hereby repealed, and this act shall be in force from and after its passage.

Approved February 9, 1877.

Amended 1891.

Sec. 6. Any person practicing medicine or surgery in this State without having first obtained a certificate of qualification from one of the authorized boards of medical examiners of this State, shall be guilty of a misdemeanor, and on conviction thereof shall be fined not less than twenty-five dollars, nor more than one hundred dollars: Provided, That this act shall not apply to any doctors or physicians now practicing in Alabama, who are graduates of a respectable medical college, and have complied with the law by having their diplomas recorded by the judge of probate in the county in which they may be practicing medicine, and this act shall not apply to any physician who has practiced medicine in this State for the past five years.

Approved February 18, 1891.

The postoffice address is shown in **Display Type**, the name of county in which is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

Alaska was purchased from Russia by the United States, in 1867, for \$7,200,000 in gold, and extends from the Diomed Islands in Behring Straits in N. latitude 66°. W. longitude 168° 50', eastward along the shore of the Arctic ocean to W. longitude 143°, N. latitude 69° 30', and from the Diomed Islands southward to N. latitude 50°, W. longitude 168°; thence eastward to the 143 meridian. It is a peninsula situated in the extreme northwestern portion of North America, and comprises an area of 577,390 square miles, or 369,529,600 acres.

The surface is broken and mountainous, and is traversed by the most northern range of the Rocky Mountains. The Yukon river, navigable for a distance of 1,000 miles, and which intersects the territory from east to west, disemboguing into the Behring Sea, between 64° and 65°, and the Coppermine, also navigable, are the principal rivers, the latter has its mouth near latitude 60°

The mean annual temperature at Sitka is about 44° F. The coast is warmed by the Japan current, which in the Pacific is the counterpart of the Gulf stream in the Atlantic. The warm, moist sea air, meeting a cold current from the mountains, causes frequent fogs and rains along the southern coast. The average rainfall is between 80 and 85 inches, the months of September and October being especially wet. The southern seaboard is fringed with dense forests of Sitka spruce, yellow cedar, fir, hemlock, larch, etc. Cereals do not ripen well; owing to the constant moisture.

The wealth of the territory lies in its furs and fisheries. Seal, bear, deer, wolves and other wild animals abound, and cod and mackerel are very plentiful.

The Territory is still unorganized, but a district government was created by act of Congress, May 17, 1884. It consists of a governor and a district court (sitting at Sitka in May, and at Wrangell in November). The clerk of the court is ex-officio secretary and treasurer of the District of Alaska.

No reliable mortality statistics are obtainable.

Arizona extends from 109 degrees to 114 degrees, 47 minutes, 6½ seconds longitude west of Greenwich, and from 31 degrees, nineteen minutes, 24 seconds, to 37 degrees north latitude, and is bounded on the north by Utah and Nevada, on the east by New Mexico, on the west by California and Nevada, and on the south by the Republic of Mexico. It comprises an area of 113,916 square miles, or 72,906,240 acres, or nearly three times the size of New York State.

The territory was organized in 1863.

After a protracted and bloody struggle, the Apache has been conquered forever, and it is no idle statement that life and property are as safe in Arizona as in any of the eastern states. The Rio Colorado, which runs through the northwestern part and along the western border, is the principal river of the territory. It is navigable for 600 miles, and with its tributaries drains an immense area of country. The Gila and Salt rivers flow through Southern Arizona. The climate is salubrious and pleasant, except in the lower sections near the Gila and Rio Colorado, where the summers are excessively hot. Rainfalls occur during the months of June, July, August and September, but numerous streams, fed by never failing springs and melting snow, supply all the water that is needed for farming purposes.

The mines of Arizona may be called its bone and sinew, and the territory is one vast network of veins and ledges. Gold, silver and copper are found in their native state and also in many rich combinations. Coal, salt, marble, antimony, tellurium and alabastine abound, and petroleum has been struck near the Apache coal fields.

Vast tracts of richly-grassed lands are open to grazers.

The following table shows the increase in population for twenty years:

1870	9,658	1890	59,620
1880	40,440		

Rate of mortality in Arizona, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1,000.	White.	Colored	Rate per 1,000 White.	Rate per 1,000 Colored.
59,620	573	9.61	543	30	9.77	7.42

Total number of deaths from consumption during 1890 was 68, which was at the rate of 1.14 per 1,000 of population, or 118.67 per 1,000 of total deaths.

MEDICAL LAWS OF ARIZONA.

AN ACT TO REGULATE THE PRACTICE OF MEDICINE IN THE TERRITORY OF ARIZONA.

Section 617. It shall be unlawful for any person to practice medicine, surgery or obstetrics in this Territory unless such person shall have obtained a diploma regularly issued by a medical college, properly and lawfully organized and existing under the laws of the State wherein said college shall be located. Such diploma must state that the person named therein is qualified to practice medicine and surgery in all of its departments.

Sec. 618. A diploma that has been, or may hereafter be, granted for a moneyed consideration or other article of value alone, and a diploma regularly issued, as hereinbefore stated, and which has been revoked or cancelled by the medical college from which it was issued, or by the act of the legislature of any State or Territory within which the same was granted, shall not be considered a sufficient qualification.

Sec. 619. Every person engaged or about to engage in the practice of medicine, surgery or obstetrics in this Territory shall register in the county recorder's office of the county where he is practicing, or intends to practice, in a book to be kept for that purpose by the county recorder, his name, residence and place of birth. He shall also present his diploma, and the county recorder shall make a true and correct copy of the same under the record of his name, residence and place of birth. The person so registering shall subscribe and verify by oath or affirmation before a person duly qualified to administer oaths, that he is the identical person named in the diploma presented for record, which affidavit shall be reduced to writing and annexed to the copy of the diploma as transcribed by the county recorder. The county recorder shall receive a fee of five dollars for each and every registration under this section, to be paid by the person so registering.

Sec. 620. Any person shall be regarded as practicing medicine, who shall profess publicly to be a physician, or who shall habitually prescribe for the sick, or who shall append to his name the letters "M. D." but nothing herein contained shall be construed to prohibit gratuitous services in cases of emergency. And the provisions of Sections 617, 618 and 619 shall not apply to lawfully commissioned surgeons of the United States army, and those who were commissioned and mustered into the United States service, as such, in the war commonly called the War of the Great Rebellion, practicing their profession within the limits of this Territory. Or physicians and surgeons who have been in the active practice of said profession for ten years, and at least three years in this Territory; Provided, that nothing in this act shall be so construed as to prevent the practice of medicine by parties and receiving pay therefor in localities situated fifteen miles or more from the residence or office of any regular physician.

Sec. 621. Any person violating any of the provisions of the four preceding sections shall be guilty of a misdemeanor.

ARKANSAS.
CAPITAL, LITTLE ROCK.

Population of State, 1,128,179.
(Census of 1890.)

Males	585,755	Native	1,113,915
Females	542,424	Foreign	14,264
Whites	818,752	Chinese ..	92
Colored	309,117	Indians	218

Number of physicians, 1,841.

Arkansas extends from 33 degrees N. latitude to 36 degrees 30 minutes N. latitude, and from 89 degrees 32 minutes W. longitude to 94 degrees 38 minutes W. longitude, and is bounded on the north by Missouri, on the west by the Indian Territory and Texas, on the south by Louisiana, and on the east by the Mississippi river, which separates it from Mississippi and Tennessee.

It was organized as a territory in 1812, and admitted as a state in 1836.

The principal rivers of Arkansas are the Mississippi, which washes the eastern shore for a distance of 400 miles; the Arkansas, which intersects the state from west to east; the St. Francis, the White and the Red rivers.

Pine forests cover a considerable part of Southern Arkansas; oak, maple and hickory predominate in the hilly portions of the state, and the large rivers are fringed with broad belts of cottonwood, cypress and gum trees.

The climate is mild, the mean annual temperature in the northern part being about 58 degrees, in the central 61 degrees, and in the southern 64 degrees. The northwestern portion is the coldest, and the southeastern the hottest. The rainfall varies from 54 inches in the southeast to 40 in the northwest.

Cotton is the great staple of the state, but tobacco is also largely grown.

Arkansas is rich in minerals. zinc, iron, lead and copper abound- ing. Novaculite, or Arkansas whitestone, is found in Hot Spring county, and is said to be the most valuable in the world. Marble, free- stone and gypsum are abundant, as is also coal, both anthracite and bituminous.

The mineral springs of the state deserve a much more extended notice than is possible in the brief space allotted to this sketch. Among these are the Eureka Springs in Carroll county, comprising the following: Basin, Harding, Crescent, Maxwell, Table Rock, Sweet, Grotto, Daisy, Mystic, Magnetic, Ozark, Cave, Oil, Blue, and forty other springs, which have long been famous for their curative properties; the Potash Sulphur Springs, about 7 miles east; the White Sulphur Springs, 3½ miles east, and the Mountain Valley Springs, 12 miles north of Hot Springs; and Wells' Antilitic Springs at Otokanah, of which the following is the analysis:

	Grains per Gallon.
Silica	0.38
Bi-Carbonate of Iron.....	2.17
Bi-Carbonate of Lime.....	12.66
Bi-Carbonate of Magnesia.....	3.17
Sulphate of Lime.....	2.54
Chloride of Iodine.....	0.88
Phosphoric Acid	0.02
Organic Matter.....	No trace
Total Salts	21.82

The following table shows the increase in population for seventy years:

1820	14,255	1860	435,450
1830	30,388	1870	484,471
1840	97,574	1880	802,525
1850	209,897	1890	1,128,179

The educational advantages are very great, and consist of the Arkansas Industrial University, at Fayetteville; Judsonia University, in White county; St. John's College and Little Rock Female College, both in the city of Little Rock, and Cane Hill College, at Boonsborough. There are, besides, many high schools and a complete system of free schools. All religious denominations are here represented, and nearly every hamlet has one or more churches or church societies. There is one medical college in the state, the Medical Department of the Arkansas Industrial University, at Little Rock.

Rate of mortality in Arkansas, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
1,128,179	14,391	12.76	10,764	3,627	13.15	11.72

Total number of deaths from consumption during 1890 was 1,209, which was at the rate of 1.07 per 1,000 of population, or 84.01 per 1,000 of total deaths.

For list of medical colleges see page 101.

MEDICAL LAWS OF ARKANSAS.

AN ACT TO CREATE COUNTY BOARDS OF MEDICAL EXAMINERS AND FOR OTHER PURPOSES, AND TO REPEAL SECTIONS 4968, 4969 AND 4970 OF SANDELS & HILL'S DIGEST.

Section 1. County Courts to appoint a County Board of Medical Examiners in their respective counties. Board to consist of three members. Qualifications of members. Duties of Board. To hold two meetings every year. Term of office four years. Vacancies, how filled. Cause for removal.

Sec. 2. Counties having two judicial districts may appoint two Boards, one for each district.

Sec. 3. Board authorized to examine all persons desiring to practice medicine and surgery, residents of the county. To issue certificates. Certificate entitles holder to practice medicine and surgery in that county or any into which his practice may extend, so long as he is resident in county issuing certificate.

4. Fee paid for examination.

5. Repeals sections 4968, 4969 and 4970 of Sandels & Hill's Digest.

Be it enacted by the General Assembly of the State of Arkansas:

Section 1. The County Courts of the several counties of this State shall appoint a County Board of Medical Examiners in and for their respective counties; the said Board shall consist of three members, learned in the sciences of medicine and surgery, of good moral character, and duly registered, and two members of said Board shall be graduates of some reputable medical college. The members of said board shall organize by taking the oath of office prescribed by the Constitution and electing one of their members Secretary, and they shall hold at least two meetings a year at their county sites. The members of said County Boards shall hold their offices for a period of four years, and said Board shall again be filled by appointment by the County Court; and all vacancies shall be filled by like appointment; Provided, the County Judge may at any time remove any County Examiner for drunkenness or other immoral conduct.

Sec. 2. In counties having two judicial districts there may be appointed two separate Boards, one for each district, in the same manner and with like effect as provided by this act for separate counties.

Sec. 3. The County Board of Medical Examiners is authorized to examine all persons who may desire to practice medicine who are residents of the county with the Board that may apply, and if found qualified to practice medicine and surgery, issue a certificate which shall entitle the holder to practice in the county in which it is issued or in any county into which his practice may extend, so long as his residence remains in the county wherein the certificate is issued.

Sec. 4. Such applicant shall pay the County Board a fee of six dollars for the examination.

Sec. 5. That sections 4968, 4969 and 4970 (of Sandels & Hill's Digest) be and the same are hereby repealed, and all other laws in conflict herewith are repealed, and this act shall take effect and be in force from and after its passage.

(This bill having been returned by the Governor with his objections thereto, and after reconsideration, having passed both houses by the constitutional majority, it has become a law this 26th day of March, 1895.

J. C. COLQUITT,
Speaker of the House of Representatives.
G. WITT, President of the Senate.)

**No Better
Advertising
Medium
Extant.**

THE MEDICAL FORTNIGHTLY "shines" through and above the very large number of journals in which we have the pleasure of being represented as advertisers. Its dignity salutes the eye of the thoughtful practitioner from the first to the last page, embodying as it does such a liberal amount of excellent ORIGINAL literature, direct from the pens of eminent writers, rather than clippings or abstracts. It has and will ever remain a pleasure to be counted among its first advertisers. Respecting its value as an advertising medium, WE KNOW OF NO BETTER.

Very truly,

F. A. HENRY.

Note.—This page looks better in colors. For proof of this fact send for a copy of our "ART BROCHURE," containing 25 half-tone engravings of our staff. Every other week, \$2.00 per annum.

California, the second largest state in the union, extends from 32 degrees 34 minutes to 42 degrees N. latitude, and from 114 degrees 8 minutes to 124 degrees 24 minutes W longitude, and is bounded on the north by Oregon, on the east by Nevada and Arizona, on the south by Mexico, and on the west by the Pacific Ocean. It comprises an area of 188,981 square miles, or 120,947,840 acres. It is naturally divided into four distinct regions: 1. The Coast Ranges; 2. The Sierra Nevada; 3. The Central Valley; 4. The Southwestern Region. California has but two large rivers, the Sacramento and San Joaquin, which traverse the Great Central Valley in opposite directions and empty into Suisun Bay, and the Klamath and Salinas and numerous smaller streams drain the state. The climate of California varies considerably in different portions, the mean annual temperature in the north being below 50 degrees F., while in the southeastern portion it exceeds 70 degrees F. The mean annual temperature at San Francisco for a period of eleven years was 55.23, and at Fort Yuma for a corresponding period, 74.77. In San Francisco rain falls freely during November and December, and the hottest months are September, October, August and July, in the order named.

The interior of the state, not being influenced by the sea, has a continental climate, and the greater the distance from the ocean the colder the nights and the warmer the days. The average annual rainfall increases from S. to N., and in the Sierra Nevada with the altitude: in Fort Yuma it is but 4 inches; in San Diego 9.16; in Sacramento 19.56; in San Francisco 21.69; and in the Sierra, at an altitude of 5,000 feet, 45 inches and more.

California may well be called the Garden of the World, for, embracing as it does every kind of soil and climate, it yields all the products of the temperate and many of the semi-tropical and tropical regions. The Sierras and the coast mountains constitute the most prominent geographical and topographical features of California. The former inosculates with the coast ranges at its two extremities, the Tejon Pass in the south, and Mount Shasta in the north. In these localities the two systems are so linked that the distinction between them becomes a geological and not a geographical one. Nearly every species of wild animal, from the grizzly to the opossum, may be found in the State, and all orders of birds common to the temperate zone are well represented. Reptiles are numerous, and the rivers and lakes swarm with members of the finny tribe, which in variety, size and quality, excel those of any other division of like extent. So much has been said and written of the great mineral resources of California as to render it unnecessary to enter into a detailed account; suffice it to say, that the State still maintains its position at the head of the mineral-producing countries of the world.

The great valleys of the Sacramento and San Joaquin are especially

adapted to agriculture, the lands being fertile and productive, and the climate all that the most exacting farmer could desire. There are many mineral springs in the State.

The educational advantages are exceptionally great, and religion is represented by churches of all denominations. For many years California has ranked among the health resorts of the world, and invalids from all parts have flocked here, and after a few months' sojourn have gone on their way rejoicing over renewed health and strength.

There are five medical colleges in the State—The Cooper Medical College, San Francisco; the Medical Department University of California, formerly Toland Medical College, San Francisco; the California Medical College, San Francisco; the Hahnemann (homeopathic), San Francisco, and the College of Medicine of the University of Southern California, Los Angeles. The following shows the increase of population for 40 years:

1850.....	92,597	1880.....	864,694
1860.....	370,994	1890.....	1,208,130
1870.....	582,031		

Rate of mortality in California, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1,000.	White.	Colored	Rate per 1,000 White.	Rate per 1,000 Colored.
1,208,130	17,713	14.65	16,422	1,281	14.77	13.28

Total number of deaths from consumption during 1890 was 2,889, which was at the rate of 2.39 per 1,000 population, or 163.19 per 1,000 of total deaths.

For list of medical colleges see page 101.

MEDICAL LAWS OF CALIFORNIA.

An Act to Regulate the Practice of Medicine in the State of California.
(Approved April 3, 1876.)

The people of the State of California, represented in Senate and Assembly,
do enact as follows:

Every person practicing medicine in any of its departments shall possess the qualifications required by this act. If a graduate in medicine, he shall present his diploma to one of the Boards of Examiners herein named, for verification as to its genuineness. If the diploma is found genuine, and if the person named therein be the person claiming and presenting the same, the Board of Examiners shall issue its certificate to that effect, signed by all the members thereof, and such diploma and certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this state. If not a graduate, the person practicing medicine in this State shall present himself before said board, and submit himself to such examinations as the said board shall require; and if the examination be satisfactory to the examiners, the said board shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned. (Amended by Act of 1878.)

Sec. 2. Each State Medical Society incorporated and in active existence on the tenth of March, eighteen hundred and seventy-six, whose members are required to possess diplomas or licenses from some legally chartered medical institution in good standing, shall appoint annually a board of examiners consisting of seven members, who shall hold their office for one year, and until their successors shall be chosen. The examiners so appointed shall go before a county judge and make oath that they are regular graduates and licentiates, and that they will faithfully perform the duties of their office. Vacancies occurring in a board of examiners shall be filled by the society appointing it, by the selection of alternates or otherwise. (Amended by Act of 1878.)

Sec. 3. The boards of examiners shall organize within three months after the passage of this act. They shall procure a seal, and shall receive through their secretary applications for certificates and examinations. The president of each board shall have authority to administer oaths, and the board take testimony in all meetings relating to their duties. They shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing. They shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the board. They shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold their meetings, they shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all their meetings. Certificates shall be signed by all the members of the board granting them, and shall indicate the medical society to which the examining board is attached.

Sec. 4. Said boards of examiners shall examine diplomas as to their genuineness, and if the diplomas shall be found genuine as represented, the secretary of the board of examiners shall receive a fee of one dollar from each graduate or licentiate, and no further charge shall be made to the applicants; but if it found to be fraudulent, or not lawfully owned by the possessor, the board shall be entitled to charge and collect twenty dollars of the applicant presenting such diploma. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and official seal of such officer, if he have a seal. Graduates may present their diplomas and affidavits, as provided in this act, by letter or by proxy, and the board of examiners shall issue its certificate the same as though the owner of the diploma was present. (Amended by Act of 1878.)

Sec. 5. All examinations of persons not graduates or licentiates shall be made directly by the board, and the certificates given by the board shall authorize the possessor to practice medicine and surgery in the State of California; but no examination into the qualifications of persons not holding diplomas or licenses shall be made after the thirty-first day of December, eighteen hundred and seventy-six. After that date no certificates shall be granted by them, except to persons presenting diplomas or licenses from legally chartered medical institutions in good standing.

Sec. 6. Every person holding a certificate from a board of examiners shall have it recorded in the office of the clerk of the county in which he resides, and the record shall be indorsed thereon. Any person removing to another county to practice shall procure an indorsement to that effect on the certificate of the county clerk, and shall record the certificate in like manner in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fees for making the record.

Sec. 7. The county clerk shall keep, in a book provided for that purpose,

a complete list of the certificates recorded by him, with the date of the issue and the name of the medical society represented by the board of examiners issuing them. If the certificate be based on a diploma or license, he shall record the name of the institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

Sec. 8. Candidates for examination shall pay a fee of five dollars, in advance, which shall be returned to them if a certificate be refused. The fees received by the board shall be paid into the treasury of the medical society by which the board shall have been appointed, and the expenses and compensation of the board shall be subject to arrangement with the society.

Sec. 9. Examinations may be in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

Sec. 10. The boards of examiners may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and they may revoke certificates for like causes. In all cases of refusal or revocation, the applicant may appeal to the body appointing the board. (Amended by Act of 1878.)

Sec. 11. Any person shall be regarded as practicing medicine, within the meaning of this act, who shall profess publically to be a physician and to prescribe for the sick, or who shall append to his name the letters "M.D." But nothing in this act shall be construed to prohibit students from prescribing under the supervision of preceptors, or to prohibit gratuitous services in case of emergency. And this act shall not apply to commissioned surgeons of the United States army and navy practicing within the limits of this state. (Amended by Act of 1878.)

Sec. 12. Any itinerant vendor of any drug, nostrum, ointment, or appliances of any kind, intended for the treatment of disease or injury, or who shall, by writing or printing, or any other method, publicly profess to cure or treat diseases, injury, or deformity, by any drug, nostrum, manipulation, or other expedient, shall pay a license of one hundred dollars a month, to be collected in the usual way. (Amended by Act of 1878.)

Sec. 13. Any person practicing medicine or surgery in this State without complying with the provisions of this act shall be punished by a fine of not less than fifty dollars (\$50), nor more than five hundred dollars (\$500), or by imprisonment in the county jail for a period of not less than thirty days nor more than three hundred and sixty-five days, or both such fine and imprisonment, for each and every offense; and any person filing, or attempting to file, as his own, the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as are made and provided by the statutes of this State for the crime of forgery.

Sec. 14. This act shall take effect from and after its passage, but the penalty shall not be enforced till on and after the thirty-first day of December, eighteen hundred and seventy-six.

An Act supplemental to and amendatory of an Act entitled "An Act to regulate the Practice of Medicine in the State of California."

(Approved April 3, 1876; amended April 1, 1878.)

The People of the State of California, represented in Senate and Assembly, do enact as follows:

Section 1. Section one of an act entitled "An Act to regulate the Practice of Medicine in the State of California," approved April 3, 1876, is hereby amended so as to read as follows: Section One. Every person in this state practicing medicine or surgery in any of its departments shall possess the qualifications required by this act. Every such person shall present his diploma to one of the Boards of Examiners herein named, together with the affidavit mentioned in section three (3) of this act. If the Board shall find all the facts required to be stated in said affidavit to be true, the Board of Examiners shall issue its certificate to that effect, signed by all the members thereof, and sealed with the seal of the Board, and such certificate shall be conclusive as to the right of the person named therein to practice medicine and surgery in any part of this state.

Sec. 2. Section two of said act is hereby amended so as to read as follows: Section Two. The Medical Society of the State of California, the Eclectic Medical Society of the State of California and California State Homeopathic Medical Society, corporations organized and existing under and by virtue of the laws of this state, and no other corporation, society, persons, or person, shall appoint annually a Board of Examiners, consisting of seven members, who shall hold their office for one year, and until their successors shall have been chosen and qualified. The Examiners so appointed shall go before a district or county judge and make oath that they are regular graduates, and that they will faithfully perform the duties of their office. Vacancies occurring in a Board of Examiners shall be filled by the society appointing it, by the selection of alternates or otherwise. The Boards of Examiners now organized, or existing under and by virtue of their appointments by the aforesaid societies, shall continue to act as such Boards until their successors are appointed at the next annual election.

Sec. 3. Section four (4) of said act is hereby amended so as to read as follows: Section Four. Said Board of Examiners shall examine diplomas as to their genuineness, and if the diploma shall be found genuine as represented, the secretary of the Board of Examiners shall receive a fee of five dollars from each graduate or licentiate, and no further charge shall be made to the applicant; but if it be found to be fraudulent, or not lawfully owned by the possessor, the Board shall be entitled to charge and collect twenty dollars of the applicant presenting such diploma. The applicant shall accompany his diploma with an affidavit stating that he is the lawful possessor of the same; that he is the person therein named; that the diploma was procured in the regular course of medical instruction, and without fraud or misrepresentation of any kind; and that the medical institution granting the diploma had, at the time of granting the same, a full corps of medical instructors, and was at the said time, a legally incorporated institution, actually and in good faith engaged in the business of medical education, and in good standing as a medical institution, and that the applicant had complied with all the requirements of said institution. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and official seal of such officer, if he have a seal. In addition to such affidavit, the Board of Examiners may hear such further testimony as in their discretion they may deem proper to hear as to the verification of any such diploma, or as to the identity of the person named therein, or as to the manner in which any such diploma was procured. And if it should appear from such testimony that any fact stated in said affidavit is untrue, the application of such person for a certificate shall be rejected. None of said Boards shall entertain an application which has been rejected by another of said Boards (nor shall any rejected application be renewed) until at least one year after the action of the Board rejecting the same.

Sec. 4. Section ten (10) of said act is hereby amended so as to read as follows: Section Ten. The boards of examiners must refuse certificates to individuals guilty of unprofessional conduct. But before any such refusal, the applicant must be cited, by a citation signed by the secretary of the board, and sealed with its seal, to appear before the board at a time and place certain, for the purpose of being heard as to such unprofessional conduct. Said citation shall notify the applicant of the time and place where and when the matter of said unprofessional conduct shall be heard; the particular unprofessional conduct with which the applicant is charged; and that the applicant shall then and there appear in person, and attended with such witnesses to testify on his behalf as he may desire, or default will be taken against him, and his application for a certificate refused. The attendance of witnesses at such hearing shall be compelled by subpoenas issued by the secretary of the board under its seal, and said secretary shall in no case refuse to issue any such subpoena on a fee of fifty cents being paid him for each subpoena. Said citations and said subpoenas shall be served in accordance with existing provisions of law as to the service of citations and subpoenas generally. At such hearing witnesses shall be examined, on the part of the board, and on the part of the applicant, as to the fact of the applicant having been guilty of the conduct set out in the citation, and either side may examine medical experts as to whether such conduct is unprofessional; and if it appear to the satisfaction of the board that the applicant is guilty of said unprofessional conduct, no certificate shall be issued to him. But no application shall be refused on the ground of unprofessional conduct, unless the applicant has been guilty of unprofessional conduct within one year next preceding his application. If any holder of a certificate be guilty of unprofessional conduct, his certificate must be revoked by the board granting it; but no such revocation shall be valid without said holder being cited to appear, and the same proceedings be had as is hereinabove provided in this section in the case of refusal to grant a certificate. Whenever a certificate is revoked, the secretary of the board revoking the same shall certify the fact, under seal of the board, to the county clerk of the county in which the person whose certificate has been revoked is, at the time of said revocation, practicing his profession, and said clerk shall thereupon write upon the margin or across the face of his register of the certificate of such person the fact of such revocation, signing his name thereto, and shall file in his office said certificate of revocation. Each of said boards may, from time to time, adopt such rules as may be necessary to the orderly conduct of all proceedings taken and had before it. It shall be the duty of the secretary of the respective boards to notify the secretary of all other boards provided for under this act of all applicants to whom licenses may have been refused, together with the reason of refusal by such boards.

Sec. 5. Section eleven (11) of said act is hereby amended so as to read as follows: Section Eleven. Any person shall be regarded as practicing medicine, within the meaning of this act, who shall profess publicly to be a physician, or who shall habitually prescribe for the sick, or who shall append

to his name the letters "M. D.," but nothing herein contained shall be construed to prohibit gratuitous services in cases of emergency. And this act, and the act to which this act is supplemental and amendatory, shall not apply to lawfully commissioned surgeons of the United States army or navy practicing their profession within the limits of this State.

Sec. 6* Section twelve (12) of said act is hereby amended so as to read as follows: Section Twelve. Any itinerant vendor who shall sell or offer for sale any drug, nostrum, ointment, or appliance of any kind intended for the treatment of disease or injury; or any person who shall, by writing or printing, or by any other method, publicly profess to cure or treat disease, injury, or deformity by any medicine, drug or drugs, nostrum, manipulation, or other expedient, shall pay a license of one hundred dollars a month. Such license shall be collected as other licenses are.

Sec. 7. Any person practicing medicine or surgery in the State, without first having procured a certificate to so practice from one of the boards of examiners appointed by one of the societies mentioned in section two of this act, shall be deemed guilty of a misdemeanor, and shall be subject to the penalties provided in section thirteen of the act to which this act is amendatory and supplemental; but no person who holds a certificate from one of such boards of examiners, or who holds a certificate heretofore granted by the board of examiners heretofore existing by virtue of appointment by the California State Medical Society of Homeopathic Practitioners, shall be compelled to procure a new certificate; and all powers and privileges of said board of examiners under the act of which this act is supplemental and amendatory are hereby transferred to the boards of examiners created by this act.

Sec. 8. Any person assuming to act as a member of a board of examiners under this act, or under the act to which this act is supplemental and amendatory, and who shall sign, or subscribe, or issue, or cause to be issued, or seal, or cause to be sealed, a certificate authorizing any person to practice medicine or surgery in this State, except the person so acting and doing be appointed by one of the societies mentioned in section two of this act, or be authorized so to do by a Board of Examiners, appointed by one of said societies, shall be deemed guilty of a misdemeanor, and shall be punished by a fine of not less than fifty dollars, or by imprisonment in the county jail for a period of not less than thirty nor more than three hundred and sixty-five days, or by both such fine and imprisonment.

Sec. 9. Should either of the said boards issue a certificate to any person whose application for a certificate has been previously rejected by another of the said boards, within one year after the rejection of said application, then in such case the certificate issued as aforesaid to said rejected applicant shall be null and void and of no effect.

Sec. 10. If any person, not a graduate or licentiate of medicine, has been unable to present himself for examination to any of said boards, as provided in section one of this act, then, and in such case, it shall be lawful for either of said boards, on good cause shown why said person was unable to so present himself for examination, to examine such person touching his qualifications to practice medicine or surgery, and if said examination shall be satisfactory to the board, it shall thereupon issue its certificate in accordance with the facts, and the lawful holder thereof shall be entitled to all the rights and privileges of graduates or licentiates to whom certificates have been issued under this act and the act to which this act is amendatory and supplemental; but no such examination shall be had after the expiration of sixty (60) days from the time this act shall take effect.

Sec. 11. This act shall be in effect from and after its passage.

*In 1883 this section (6) was held by the criminal courts of San Francisco to be invalid, by reason of being in conflict with the new constitution.

The postoffice address is shown in **Display Type**, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

The postoffice address is shown in Display Type, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

COLORADO.

CAPITAL, DENVER.

Population of State, 412,198.

(Census of 1890.)

Males	245,247	Native	328,208
Females	166,951	Foreign	83,990
White	404,468	Chinese	1,408
Colored	6,215	Indians	107

Number of Physicians, 918.

Colorado extends from 37 degrees to 41½ degrees N. latitude and from 102 degrees to 109 degrees W longitude, and is bounded on the north by Wyoming and Nebraska, on the east by Nebraska and Kansas, on the south by New Mexico and the Indian Territory, and on the west by Utah. It is the third largest State in the Union, ranking after Texas and California, and comprising an area of 104,500 square miles, or 66,860,000 acres. The main range of the Rocky Mountains runs through the center of the State and forms the "Continental Divide." From one side the streams flow into the Gulf of Mexico, and from the other into the Pacific ocean.

The principal rivers are the South Platte and Arkansas, and these with their tributaries suffice to irrigate all the farm lands in the great agricultural counties of the State. The streams are fringed by cottonwood, box elder and willow trees, and in the foot hills and on the mountains pure spruce and cedar cover vast areas.

Rain falls from May to July, and the other months are dry.

The mean annual temperature is about 48 degrees.

Rich native grasses and an abundant supply of pure, cold water, render the State peculiarly attractive to stock-raisers and dairy farmers. Nearly every variety of mineral and ore is found in Colorado, and in the production of silver it stands at the head of all States in the Union.

Iron and coal abound, as do also gold, lead, copper, zinc, mercury, granite, marbles, sandstone, fire and pottery clay, gypsum and lithographic stone. The climate is proverbially healthful, the atmosphere is dry, free from malarial poisons and highly electric, acting as an invigorating draught.

The following table shows the increase in population for 30 years:

1860.....	34,277	1880.....	195,234
1870.....	99,864	1890.....	412,198

There are numerous mineral springs in the State, among them being the famous Manitou Mineral and Glenwood Springs.

There are four medical colleges in the State—the Medical Department of the University of Denver, in Denver; the Medical Department of the University of Colorado, in Boulder; the Gross Medical College, in Denver, and the Denver Homoeopathic Medical College, in Denver.

Rate of mortality in Colorado, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
412,198	5,453	13.23	5,367	86	13.27	11.13

Total number of deaths from consumption during 1890 was 489, which was at the rate of 1.18 per 1,000 of population, or 89.68 per 1,000 of total deaths.

For list of medical colleges see page 101.

MEDICAL LAWS OF COLORADO.

AN ACT TO PROTECT THE PUBLIC HEALTH AND REGULATE THE PRACTICE OF MEDICINE IN THE STATE OF COLORADO.

Be it enacted by the General Assembly of the State of Colorado:

Section 1. That a board is hereby established which shall be known under the name and style of the State Board of Medical Examiners, to be composed of nine practicing physicians of known ability and integrity, who are graduates of medical schools of undoubted respectability, giving each of the three schools of medicine (known as the regular, homeopathic and eclectic schools) a representation as follows, to wit: six physicians of the regular, two of the homeopathic, and one of the eclectic school or system of medicine.

Sec. 2. The Governor of this State, shall, as soon as practicable after this act shall have become a law, appoint a State Board of Medical Examiners, as provided in section one of this act, and the members first appointed shall be so designated by the Governor that the term of office of three shall expire in two years from the date of appointment, the term of office of three shall expire in four years from the date of appointment, and the term of office of three shall expire in six years from the date of appointment; thereafter, the Governor shall biennially appoint three members, possessing qualifications as specified in section one, to serve for the term of six years, and he shall also fill all vacancies that may occur, as soon as practicable: Provided, that in making biennial appointments, or filling vacancies, the representation of the medical schools in the board shall not be changed from the original basis, as in section one of this act.

Sec. 3. The board of medical examiners shall, as soon after their appointment as practicable, organize by the election of one of their members as president, one as secretary, and one as treasurer, and adopt such rules as are necessary for their guidance in the performance of duties assigned them, and also to adopt a seal, which shall be affixed to all certificates issued by them to practitioners of medicine.

Sec. 4. That every person practicing medicine in any of its departments, shall possess the qualifications required by this act. If a graduate in medicine, he shall present his diploma to the State Board of Medical Examiners for verification, or furnish other evidence conclusive of his being a graduate of a legally-chartered medical school in good standing; the State Board of Medical Examiners shall issue its certificate to that effect, signed by a majority of the members thereof, and such diploma or evidence shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State. If not a graduate of a legally-chartered medical institution in good standing, the person practicing or wishing to practice medicine in this State, shall present himself before said board of medical examiners and submit himself to such examination as defined in section seven of this act, and if the examination be satisfactory to the examiners, the said board of medical examiners shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned. All persons who have made the practice of medicine and surgery their profession or business continuously for the period of ten (10) years, within this State, and can furnish satisfactory evidence thereof to the State Board of Medical Examiners, shall receive from said board a license to continue practice in the State of Colorado.

Sec. 5. The State Board of Medical Examiners, within ninety (90) days after the passage of this act, shall receive, through its president, applications for certificates and examinations. The president of said board of medical examiners shall have the authority to administer oaths, and the said board of medical examiners to take testimony in all matters relating to its duties. It shall issue certificates to all who furnish satisfactory proofs of having received diplomas from some legally chartered medical institution in good standing. It shall prepare two (2) forms of certificates—one for persons in possession of diplomas, the other for candidates examined by its members. It shall furnish to the county clerks of the several counties a list of all persons receiving certificates. Certificates shall be signed by a majority of the members of the board of medical examiners granting them.

Sec. 6. There shall be paid to the treasurer of the State Board of Medical Examiners a fee of five dollars (\$5) for each certificate issued to graduates or practitioners of ten (10) years' standing, and no further charges shall be made to the applicant. Candidates for examination shall pay a fee of ten dollars (\$10) in advance.

Sec. 7. All examinations of persons not graduates shall be made directly by the State Board of Medical Examiners. Examinations may be in whole, or part, in writing, and the subjects of examination shall be as follows: anatomy, physiology, chemistry, pathology, surgery, obstetrics, and practice of medicine (exclusive of materia medica and therapeutics).

Sec. 8. Every person holding a certificate from the State Board of Medical Examiners shall have it recorded in the office of the clerk of the county in which he resides, and the record shall be indorsed thereon. Any person removing to another county to practice shall procure an indorsement to that effect on the certificate, from the county clerk, and shall record the certificate in like manner in the county to which he removes, and the holder of the certificate shall pay to the county clerk a fee of one dollar (\$1) for making the record.

Sec. 9. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him. If the certificate be based on a diploma, he shall record the name of the medical institution conferring it and the date when conferred. This register shall be open to public inspection in business hours.

Sec. 10. The State Board of Medical Examiners may refuse certificates to individuals who have been convicted of conduct of a criminal nature, and they may revoke certificates for like causes.

Sec. 11. Any person shall be regarded as practicing medicine within the meaning of this act who shall profess publicly to be a physician and prescriber for the sick, or shall attach to his name the title "M. D.," or "Surgeon," or "Doctor," in a medical sense. But nothing in this act shall be construed to prohibit gratuitous services in cases of emergency.

Sec. 12. Any person practicing medicine or surgery in any of their departments, in this State, without complying with the provisions of this act, shall be punished by a fine of not less than fifty dollars (\$50), nor more than three hundred dollars (\$300), or by imprisonment in the county jail for not less than ten (10) nor more than thirty (30) days, or by fine and imprisonment, for each and every offense; and any person filing, or attempting to file, as his own, the diploma or certificate of another, or who shall give false or forged evidence of any kind, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as are made and provided by the statutes of this State for the crime of forgery.

Sec. 13. All fees received by the treasurer of said board of examiners, and all fines collected by any officer of the law, under this act, shall be paid into the State treasury; and all necessary expenses of the board shall be paid for out of the funds of the State treasury not otherwise appropriated; but no fees shall be required or accepted by any member of the board for services.

Sec. 14. The State Board of Medical Examiners shall meet as a board of medical examiners in the city of Denver, on the first Tuesdays of January, July and October of each year, and at such other times and places as may be found necessary for the performance of their duties.

Approved March 14, 1881.

Sec. 15. (Amendatory.) No person shall be deemed to have violated the provisions of this act, or the act of which it is amendatory, who has complied with provisions on their part; and it shall be the duty of the State Board of Medical Examiners to issue certificates to all persons, authorizing them to practice medicine in this State, who shall have complied with the provisions of this act, and the act of which it is amendatory, including graduates of the electropathic school, without prejudice, partiality, or discrimination as to schools or systems of practice or medicine. That only courts of record in the State of Colorado shall have jurisdiction over and power to enforce the provisions of this act.

CAUTION.

Beware of so-called State Medical Directories, copied from our Medical and Surgical Register by irresponsible persons, and palmed off as original publications. This fraud has been perpetrated in various parts of the country, notwithstanding our efforts to prevent it by prosecution under the copyright law.

To avoid being imposed upon, you should ascertain the standing and responsibility of the publisher before signing an order.

Our friends will confer a favor upon us, as well as the medical profession, by promptly giving notice of any such attempted fraud.

CONNECTICUT.

CAPITAL, HARTFORD.

Population of State, 746,258.

(Census of 1890.)

Males	369,538	Native	562,657
Females	376,720	Foreign	183,601
Whites	733,438	Chinese	290
Colored	12,302	Indians	228

Number of physicians, 1,139.

Connecticut, one of the original thirteen states, extends from 41 degrees to 42 degrees 2¾ minutes N. latitude, and from 70 degrees 55 minutes to 73 degrees 50 minutes W. longitude, and is bounded on the north by Massachusetts, on the east by Rhode Island, on the west by New York, and on the south by Long Island Sound. It comprises an area of 4,730 square miles, or 3,027,200 acres. The principal rivers are the Connecticut, the Thames, Housatonic, Naugatuck, Shepaug, Noratton, Norwalk and Mystic. Numerous miniature lakes are distributed over its surface.

The climate is marked by great extremes and sudden changes; the winters are cold, the summers very warm. The district bordering on the sea is the hottest, and the northwestern portion the coldest. The mean annual temperature, as observed at the capital, is about 50 le-grees, and the rainfall varies from 41 to 47 inches, according to the place of observation.

The principal minerals are copper, cobalt, barytes, hydraulic lime, bismuth, valuable building stone, marble, nickel and feldspar.

The higher portions are well adapted to agriculture, which forms an important item in the industries of the state.

The following table shows the increase in the population for ninety years:

1800	251,002	1850	370,792
1810	261,942	1860	460,187
1820	275,148	1870	537,454
1830	297,675	1880	662,700
1840	309,978	1890	746,258

The medical department of Yale University is the only medical in-stitution in the state; it is located in New Haven.

Connecticut has no lofty mountains, but it includes the southern extremities of the two great New England ranges, the Green and the White Mountains. The state possesses many excellent harbors on Long Island Sound.

Rate of mortality in Connecticut, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1,000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
746,258	14,470	19.52	14,161	309	19.31	24.10

The number of deaths from consumption during 1890 was 1,743, which was at the rate of 2.34 per 1,000 of population, or 120.46 per 1,900 of total deaths.

For list of medical colleges see page 101.

MEDICAL LAWS OF CONNECTICUT.

AN ACT CONCERNING THE PRACTICE OF MEDICINE, SURGERY AND MIDWIFERY.

Be it enacted by the Senate and House of Representatives in General Assembly convened:

Section 1. No person after the first day of October, 1893, shall, in this State, for compensation, gain or reward, received or expected, treat, operate or prescribe for any injury, deformity, ailment, or disease, actual or imaginary, of another person, nor practice surgery or midwifery, unless or until he has obtained a certificate of registration as hereinafter provided, and then only in the kind or branch of practice as stated in said certificate; but this act shall not apply to dentists while practicing dentistry only; nor to any person in the employ of the United States government while acting in the scope of his employment; nor to any person who shall furnish medical or surgical assistance in cases of sudden emergency; nor to any person residing out of this state who shall be employed to come into the state to assist or consult with any physician or surgeon who has been registered in conformity with the provisions of this act; nor to any physician or surgeon then actually residing out of this state who shall be employed to come into this state to treat, operate or prescribe for any injury, deformity, ailment or disease from which any person is suffering at the time when such non-resident physician or surgeon is so employed; nor to any actual resident of this state recommending by advertisement or otherwise the use of proprietary remedies sold under trade-marks issued by the United States government; nor to any chiropodist or clairvoyant who does not use in his practice any drugs, medicines or poison; nor to any person practicing the massage method, or Swedish movement cure, sun cure, mind cure, magnetic healing, or Christian science; nor to any other person who does not use or prescribe in his treatment of mankind, drugs, poisons, medicine, chemicals, or nostrums.

Sec. 2. Any resident of this state who at the time of the passage of this act shall be, or previously thereto has been actually engaged in this state in the practice of medicine, surgery, midwifery, or any alleged practice of healing, may, before the first day of October, 1893, file with the state board of health duplicate statements subscribed and sworn to by him upon blanks furnished by said board, giving his name, age, and place of birth, and present residence, stating whether he is a graduate of any medical college or not, and if so, of what college, and the date of such graduation, and, if practicing under a license from any of the medical societies of this state, stating which society and the date when said license was obtained, and also stating the length of time during which said person has been engaged in practice in this state and how long in practice elsewhere; and he shall also state whether he has been engaged in general practice, or only in some special branch of medicine or surgery, and if so, what branch. Upon the receipt of such statements, as aforesaid, the state board of health shall issue, upon the receipt of two dollars, to the person filing the same, a certificate of registration which shall state the kind or branch of practice in which the person named therein is engaged.

Sec. 3. Any person who shall, subsequent to said first day of October, 1893, file with said state board of health duplicate statements in the form prescribed in the preceding section, showing that he is a graduate of a medical college which is recognized as reputable by any one of the chartered medical societies of the state, shall receive from said state board of health, upon the payment of two dollars, a certificate of registration, which shall state the kind or branch of practice in which the person named therein is engaged or is to be engaged.

Sec. 4. Any person residing in any town in another state which town adjoins the boundary line of Connecticut, who at the time of the passage of this act shall be actually engaged in such town in the practice of medicine, surgery, or midwifery, or any branch of practice, may, before the first day of October, 1893, obtain from the state board of health of this state a like certificate of registration, upon the payment of two dollars and upon filing duplicate statements in the form prescribed in section two, which statements shall also show that he is entitled to receive such certificate under the provisions of this section.

Sec. 5. Except as provided in sections two, three and four of this act, no person shall, after the first day of October, 1893, obtain or receive a certificate of registration, as required by the provisions of section one, until he has passed a satisfactory examination before a committee to be appointed for the purpose by the state board of health, as hereinafter provided, nor until he has filed with said board of health duplicate certificates as aforesaid, together with duplicate certificates signed by a majority of one of said examining committees, stating that they have found him qualified to practice either medicine, surgery, or midwifery, and any person filing said certificates shall receive from said state board of health, upon the payment of two dollars, a certificate of registration which shall state that the person named has been found qualified so to practice.

Sec. 6. During the month of December, 1893, The Connecticut Medical Society, The Connecticut Homeopathic Medical Society, and The Connecticut Eclectic Medical Association, shall each file with the state board of health the names of five physicians, and annually in the month of December thereafter, the name of one physician practicing in this state, who shall have been recommended by the respective medical societies as persons competent to serve upon the examining committees to be appointed by the state board of health as hereinafter provided, and from time to time, in case any vacancy occurs upon any of said examining committees the president of the respective society shall nominate and the state board of health shall appoint such person to fill said vacancy.

Sec. 7. In the month of January, 1894, the state board of health shall appoint three examining committees, each consisting of five physicians, which committee shall severally be composed wholly of the persons nominated by one of the said medical societies respectively, as aforesaid. One of the members of each of said committees shall be appointed for one year, one for two years, one for three years, one for four years, and one for five years. Thereafter, in the month of January in each year, the state board of health shall appoint one member of each of said committee, who shall have been nominated for such office as aforesaid, to serve five years; and said board shall in the same manner fill any vacancy occurring at any time in any of said committees.

Sec. 8. The state board of health shall designate when and where said committees shall hold said examinations, but shall call a meeting of a committee within thirty days after receipt of application for examination by it. Applicants to practice medicine or surgery shall be examined in anatomy, physiology, medical chemistry, obstetrics, hygiene, surgery, pathology, diagnosis, and therapeutics, including practice and materia medica. Each committee shall frame its own questions and conduct its examinations in writing, and both questions and answers shall be placed on file with the state board of health. Each applicant shall have the right to choose which of the three committees shall be the one by whom he shall be examined; but before taking such examination he shall pay to the committee their expenses, not exceeding, however, the sum of ten dollars. An applicant, after having been rejected by any of said examining committees, shall not be eligible to examination by another committee of examination until after the expiration of twelve months.

Sec. 9. Upon the receipt of any duplicate statements as hereinbefore provided, the state board of health shall transmit one of said duplicate statements, together with a duplicate of the certificate of registration in each case, to the town clerk of the town wherein the person so filing said statement resides; and in case such person does not reside in the state of Connecticut, then the state board of health shall transmit said statement and certificate to the town clerk of the town in this state nearest to the place of residence of such person; and said town clerks shall record the same in books to be provided for that purpose by the state board of health, and shall then return the same to the person who filed the same with the board of health; and said town clerk shall receive for such recording a fee of twenty-five cents, to be paid by the state board of health out of the amount so paid to it as aforesaid.

Sec. 10. The secretary of each of said medical societies shall file with the secretary of the state board of health a list of medical colleges or institutions recognized as legal and reputable by his society; or all of such secretaries may agree upon a single list; and such list or lists may be corrected from time to time as may be necessary.

Sec. 11. Every person violating any of the provisions of section one of this act shall be deemed guilty of a misdemeanor, and on conviction shall be punished by a fine of not less than one hundred nor more than three hundred dollars for the first offense, and for each subsequent offense by a fine of not less than two hundred nor more than five hundred dollars, or by imprisonment in the county jail for not less than thirty nor more than ninety days, or by both such fine and imprisonment; the fine, when collected, shall be paid one-half to the person or corporation making the complaint, and the other half to the state board of health.

Sec. 12. Any person who shall swear to any false statement contained in any statement required by this act to be filed with the state board of health, shall be deemed guilty of perjury and be punished accordingly.

Sec. 13. The state board of health may, from time to time, appoint one of its number, or a person not a member of its board, to discharge the clerical duties imposed by this act upon said board, and may fix and pay a salary therefor, to be paid only out of the fees and penalties received under the provisions of this act.

Sec. 14. Sections 3006, 3007 and 3008 of the general statutes are hereby repealed, but nothing herein shall be construed to repeal or affect any of the provisions of any private charter.

Sec. 15. The provisions of this bill shall not apply to licensed pharmacists.

Sec. 16. All physicians or surgeons practicing under the provisions of this act shall, when requested, write a duplicate of their prescriptions in the English language. Any person who shall violate the requirements of this section shall pay a fine of not less than ten dollars for each and every offense.

Walnut Lodge Hospital,

HARTFORD, CONN.

Organized in 1880 as a Private Hospital for the Special Cure and Treatment of Alcohol and Opium Inebriates. This Institution is based on the modern view that **Inebriety** is a **Disease** and **Curable**, and that the best results are obtained in the treatment of these cases in small hospitals, where each case can receive the individual care of the physician.

This Institution is finely situated on the outskirts of the city, and the rooms are all large, heated with steam, and lighted with gas, and arranged for comfort, so that each one can have all the advantages of a large asylum with the quiet and privacy of a home. The treatment comprises the use of every means which science and experience have found to be of value in building up the brain and nervous system, and includes

TURKISH, VAPOR, ROMAN, ELECTRICAL AND SALINE BATHS,

MASSAGE, ELECTRICITY,

and other remedies. Experience shows that a large proportion of cases who come for treatment, and earnestly use all the means provided, are permanently restored. Each case is treated individually, and the special care and restraint is adapted to the needs of each one. Only a limited number of cases are received, and every patient is under the direct, personal care of an attendant and the physician.

Applications for admission, and all letters of inquiry, should be addressed

Delaware is bounded on the north by Pennsylvania, on the west and south by Maryland, and on the east by the Atlantic ocean and the Delaware river and bay, and extends from 38 degrees 28 minutes to 39 degrees 50 minutes N. latitude. It is one of the thirteen original states, and comprises an area of 2,120 square miles, or 1,356,800 acres. The Delaware river, which washes the eastern border, is the only navigable river in the state, the other rivers being the Indian and Nanticoke. The climate is mild, the mean annual temperature being about 53 degrees. The soil in the interior is light and easily cultivated, and peach-growing is a prominent industry. The surface in the north is diversified with hill and dale, but in the southern portion it is almost a dead level.

Manufacturing engages the attention of a considerable portion of the population, and is carried on chiefly in Wilmington and vicinity. The maritime commerce of Delaware is not extensive, despite the fact that it borders on navigable waters.

The following table shows increase in population for thirty years:

1860 ..	112,216	1880 ..	146,608
1870 ...	125,015	1890	168,493

There are no medicinal springs in the state.

Rate of mortality in Delaware, as computed from the United States census of 1890:

vation of human life demands that none but competent and properly qualified physicians and surgeons shall be allowed to practice their profession, therefore,

Be it enacted by the Senate and House of Representatives of the State of Delaware in General Assembly met:

Section 1. That there shall be established a Medical Council of Delaware, consisting of the Chief Justice of the State, and of the presidents of the two state boards of medical examiners, provided for in this act.

Sec. 2. The said council shall be known by the name and style of the "Medical Council of Delaware," and may make and adopt all necessary rules, regulations and by-laws for their own government, not inconsistent with the laws of this state or of the United States, and shall have power to locate and maintain an office within this state for the transaction of business. Two members of said council shall constitute a quorum for the transaction of business.

Sec. 3. The said council shall organize within ten days from the date of the organization of the two boards of medical examiners, and shall elect from its own number a president and a secretary, who shall also act as treasurer, both of whom shall hold their offices for one year, or until their successors are chosen.

Sec. 4. The members of said council shall receive, in addition to their necessary expenses, five dollars per day each for each meeting of the council, but said per diem shall not exceed in any one year more than fifteen dollars, the same to be paid out of the fees hereinafter provided for.

Sec. 5. The said Medical Council shall hold two stated meetings in each year, and may hold special meetings at such times as it may deem proper. It shall issue certificates for license to practice medicine and surgery, to such applicants as have presented such diplomas as hereinafter required, and successfully passed the examination hereinafter provided, and the said Medical Council shall have no powers, duties or functions except as provided for in this act.

Sec. 6. That from and after the passage of this act, there shall be, and continue to be, two separate boards of medical examiners for the State of Delaware, one representing "The President and Fellows of the Medical Society of Delaware," and the other "The Homeopathic Medical Society of Delaware State and Peninsula."

Each board shall consist of five members, and each of said members shall serve for a term of two years, from the first day of March next after appointment, with the exception of those first appointed, who shall serve as follows, namely: Two of each board for one year, and three of each board for two years, from the first day of March, A. D. 1895.

The Governor shall appoint the members of said boards of examiners respectively, from the lists of members submitted by said medical societies residing in this state, which lists shall within ten days from the passage of this act, and on or before the first day of every January thereafter, be transmitted to the Governor under the seal, and signed by the secretary of the society so nominating.

From these lists of nominees respectively, the Governor shall, within ten days after the receipt thereof, appoint two separate boards of medical examiners, each board to be composed exclusively of members of the same medical society. In case of the failure of either of the said societies to submit lists as aforesaid, the Governor shall appoint members in good standing of the corresponding society, entitled to nominate without other restrictions.

Each one of the said appointees must be a registered physician in good standing, and shall have practiced medicine or surgery under the laws of this state for a period of not less than five years prior to such appointment.

The Governor shall fill vacancies by death or otherwise for unexpired terms of said examiners, from the lists submitted as aforesaid, and may remove any member of either of said boards for continued neglect of the duties required by this act, or on recommendation of the medical society of which said member may be in affiliation, for unprofessional or dishonorable conduct.

The Governor shall in his first appointments designate the number of years for which each appointee shall serve.

The appointments of successors to those members whose term of office will expire on the first day of March of each year, shall be made by the Governor during the first ten days of January of such year, upon the same conditions and requirements as hereinbefore specified with reference to the appointment of two separate examining boards, each to be composed exclusively of members of the same medical society as hereinbefore provided.

Sec. 7. Said boards shall be known by the name and style of "Boards of Medical Examiners of the State of Delaware." Every person who shall be appointed to serve on either of said boards shall receive a certificate of appointment from the Secretary of State under his hand. Each of said boards of examiners shall make and adopt all necessary rules, regulations and by-laws not inconsistent with the laws of this state or of the United

States, whereby to perform the duties and transact the business required under the provisions of this act.

Sec. 8. From the fees provided by this act the Medical Council shall pay, not to exceed said income, all proper expenses incurred by its provisions, and if any surplus above said expenses shall remain at the end of any year, it shall be apportioned among said medical societies pro rata according to the number of candidates examined by each.

Sec. 9. The first meeting of each of the examining boards respectively shall be held on the first Tuesday of July, 1895. At such meeting of each of the boards respectively an organization shall be effected by the election from their own membership of a president and secretary for the purpose of examining applicants for certificates for license. Each of said boards of medical examiners shall hold two or more stated or special meetings in each year; due notice of which shall be made public at such times and places as they may determine. At said stated or special meetings a majority of the members of either board shall constitute a quorum thereof, but the examination may be conducted by a committee duly authorized by said boards.

Sec. 10. Each board of medical examiners not less than one week prior to each examination shall submit to the Medical Council of Delaware questions for thorough examinations in anatomy, physiology, hygiene, chemistry, surgery, obstetrics, pathology, diagnosis, therapeutics, practice of medicine and materia medica.

The Medical Council shall select the questions for such examinations from the lists of questions submitted by the board of medical examiners of the candidate's election; and should there be candidates for examination of any other school than the two designated in this act, they shall be examined by the council and some reputable practitioner in this state of such school by said council to be selected, upon questions selected from standard text books, on the above subjects, as taught by the school selected by the candidate.

Sec. 11. Said examination shall be conducted in writing in accordance with the rules and regulations prescribed by the respective boards of medical examiners, and shall embrace the subjects named in section 10 of this act. After each examination the board of medical examiners having charge thereof shall, without unnecessary delay, act on the same. An official report of such action, signed by the president, secretary and each acting member of said board of medical examiners, stating the result of examination, shall be transmitted to the Medical Council.

Sec. 12. On receiving from either of said boards of medical examiners such official report of the examination of any applicant for certificate for license, the Medical Council shall issue forthwith to each applicant who shall have been returned as having successfully passed the examination, a certificate to that effect.

The Medical Council shall keep a record of all certificates, when and to whom issued.

Sec. 13. From and after the passage of this act, any person not heretofore authorized to practice medicine and surgery in this state, and desiring to enter upon such practice, shall deliver to the secretary of the Medical Council, upon the payment of a fee of ten (\$10) dollars, a written application for examination, together with satisfactory proof that the applicant is more than twenty-one years of age, is of good moral character, has obtained a competent common school education, and has received a diploma conferring the degree of Medicine from some legally incorporated medical college. Applicants who have received their degree in Medicine after the passage of this act, must have pursued the study of medicine for at least four years, including three regular courses of lectures in different years, in some legally incorporated medical college or colleges prior to the granting of said diploma. Such proof, if required, shall be made upon affidavit. Upon making of said payment and proof, the Medical Council shall issue to said applicant an order for examination before such one of the state boards of medical examiners as the applicant for certificate may select. In case of failure at any such examination, the candidate, after the expiration of six months and within two years, shall have the privilege of a second examination by the same board to which application was first made, without the payment of an additional fee, but if after six months and before two years from such examination said application shall be withdrawn, the said (\$10) shall upon demand be returned.

Sec. 14. That from and after the passage of this act it shall not be lawful for any person to practice medicine or surgery in this state without having obtained a license therefor as hereinafter provided.

Sec. 15. The Clerk of the Peace of any of the counties of this state shall issue a license, signed by the Governor and countersigned by the Secretary of State and sealed with the seal of his office, certifying that such person is authorized to practice medicine and surgery in this state, conformably to the laws thereof, to any person who shall present to him a certificate as

provided in this act, or who shall have been qualified in one of the counties of this state prior to the passage of this act, and to no other person.

Sec. 16. The provisions of this act shall not apply to physicians who are practitioners of any other state coming into this state in consultation with any lawful practitioner of medicine and surgery in this state.

Sec. 17. Any person practicing or attempting to practice medicine or surgery within this state contrary to the provisions of this act shall be guilty of a misdemeanor and upon conviction thereof in the Court of General Sessions of the Peace and Jail Delivery of the county wherein the offense was committed, shall pay a fine of not more than five hundred (\$500) nor less than one hundred (\$100) dollars, or be imprisoned for a term of not more than one year.

Sec. 18. That this act shall not in any way apply to dentists or to dental surgery.

Sec. 19. All other acts or parts of acts regulating the practice of medicine and surgery in this state are hereby repealed; but nothing herein contained shall in any way interfere with the operation of chapter 117, volume 13, laws of Delaware, relating to revenue.

DISTRICT OF COLUMBIA.

Population of District, 230,392.
(Census of 1890)

Males	109,584	Native	211,622
Females	120,808	Foreign	18,770
White	154,695	Chinese	100
Colored	75,572	Indians	23

Number of Physicians, 857.

The District comprises an area of 64 square miles, or 40,960 acres, and is bounded on the south by the Potomac river, the balance being enclosed by the State of Maryland. The east Potomac river and Rock creek traverse the District and disembogue into the Potomac. The soil is fertile and productive. The climate is genial, the mean annual temperature being 56.16 degrees, and the average annual rainfall 37.62 inches.

The following table shows increase in population during 50 years.

1840.....	43,712	1870.	131,700
1850.....	51,687	1880.	177,624
1860.	75,080	1890.....	230,392

The entire District constitutes the county of Washington, in which the city of Washington, the capital of the United States, is situated. The medical institutions in the District are the National Medical College (Medical Department Columbian University), Medical Department of the University of Georgetown, Medical Department of Howard University, Medical Department of National University, and Washington Homoeopathic Medical College—all located in the city of Washington. Rate of Mortality in the District of Columbia, as computed from U. S. Census of 1890.

MEDICAL LAWS OF DISTRICT OF COLUMBIA.

AN ACT to revise, with amendments, an act to incorporate the Medical Society of the District of Columbia.

Be it Enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

Section 1. That Frederick May, M. D., Alexander McWilliams, and twenty others, and such other persons as they may from time to time elect, and their successors, are hereby declared to be a community, corporation and body politic, forever, or until Congress shall by law direct this charter to cease and determine, by and under the name and title of the Medical Society of the District of Columbia; and by and under the same name and title they shall be able and capable in law to purchase, take, have and enjoy, to them and their successors, in fee or for lease, estate or estates, any land, tenements, rents, annuities, chattels, bank stock, registered debts, or other public securities within the district, by the gift, bargain, sale or demise, of any person or persons, bodies politic or corporate, capable to make the same, and the same, at their pleasure, to alien, sell, transfer, or lease and apply to such purposes as they may adjudge most conducive to the promoting and disseminating medical and surgical knowledge, and for no other purpose whatever: Provided, nevertheless, that the said society or body politic shall not at one time, hold or possess property, real, personal, or mixed, exceeding in total value the sum of six thousand dollars per annum.

2. That the members of the said society above designated shall hold, in the city of Washington, two stated meetings in every year, viz: on the first Mondays in January and July; the officers of the society to consist of a president, two vice-presidents, one corresponding secretary, one recording secretary, one treasurer and one librarian, who shall be appointed on the first Monday in July, one thousand eight hundred and thirty-eight, and on the annual meeting in January forever thereafter, and who shall hold their offices for one year, and until others are chosen in their stead (not less than seven members being present at such meeting); and the society may make a common seal and may elect into their body such medical and chirurgica practitioners, within the District of Columbia, as they may deem qualified to become members of the society, it being understood that the officers of the society now elected are to remain in office until the next election after the passage of this act.

3. That it shall and may be lawful for the said medical society, or any members of them attending (not less than seven), to elect by ballot five persons residents of the District of Columbia, whose duty it shall be to grant licenses to such medical and chirurgica gentlemen as they may, upon a full examination, judge qualified to practice the medical and chirurgica arts, or as may produce a diploma from some respectable medical college or society, each person so obtaining a certificate to pay a sum not exceeding ten dollars, to be fixed on or ascertained by the society.

4. That any three of the examiners shall constitute a board for examining such candidates as may apply, and shall subscribe their names to each certificate by them granted, which certificate shall also be countersigned by the president of the society, and have the seal of the society affixed thereto by the secretary, upon paying into the hands of the treasurer the sum of money to be ascertained as above by the society; and any one of the said examiners may grant a license to practice until a board in conformity to this act can be held: Provided, that nothing herein contained shall authorize the said corporation in any wise to regulate the practice of medical or chirurgica

5. That after the appointment of the aforesaid medical board, no person not heretofore a practitioner of medicine or surgery within the District of Columbia, shall be allowed to practice within the said district, in either of said branches, without first having obtained a license testified as by this law directed, or the production of a diploma from a respectable medical college or a board of examiners established by law: Provided, that the professors in such college or the examiners in such board be men regularly instructed in medicine and surgery and the collateral branches of medical education,

A SYNOPSIS OF THE NEW MEDICAL LAWS OF THE DISTRICT OF COLUMBIA.

The measure provides for the creation of a board of medical supervisors, consisting of the presidents of the three boards of medical examiners and two persons, not physicians, one of whom shall be learned in the law, to be appointed by the District Commissioners. No more than two members of the board shall be adherents of any one system of medical practice. The Commissioners are granted power to remove any member and to fill vacancies.

The duties of this board are to carry into effect the provisions of this act, shall supervise all examinations provided for, shall issue all licenses to practice medicine and surgery or midwifery in the District, shall keep a register of all applicants for examination, and this register is to be prima facie evidence of all matters contained therein.

The act provides that after the 1st day of July, 1896, all persons desiring to practice medicine and surgery in any of their branches must apply to the Board of Medical Supervisors for a license to do so. It also provides the subjects on which the examination shall be made and all applicants must be of good moral character, and over twenty-one years of age, and must have a diploma conferring the degree of doctor of medicine from some medical college authorized by law to confer such a degree.

The act further provides that immediately upon the passage of this act the District Commissioners shall appoint three boards of medical examiners, one to be known as the Board of Medical Examiners of the District of Columbia, and to be composed of five physicians in good standing, adherents to the regular system of medical practice, one to be known as the Board of Homoeopathic Medical Examiners of the District of Columbia, and to be composed of five physicians in good standing, adherents to the Homoeopathic system of medical practice, to be selected from a list of not less than ten names, submitted by a majority vote at some regular meeting of the Washington Homoeopathic Medical Society, and one to be known as the Board of Eclectic Medical Examiners of the District of Columbia, to be composed of five physicians in good standing, adherents to the Eclectic system of medical practice, to be selected from a list of not less than ten names, submitted by a majority vote at some regular meeting of the Eclectic Medical Society of the District of Columbia.

Each board is to hold a meeting for examination in the city of Washington on the second Thursday in January, April, July and October of each year and continue in session as long as necessary.

The boards must present to the Board of Supervisors a list of questions to be asked, from which the supervisors must select. Examinations are to be conducted orally and in writing. If the applicant successfully passes the examination he is granted a license.

By a vote of four members the Board of Supervisors may refuse to grant or revoke a license. They also make all the regulations to determine the qualifications of women desiring to practice midwifery. Appeal from the decision of the board may be taken at any time to the Court of Appeals of the District.

The provisions of the act do not apply to the commissioned surgeons of the United States Army, Navy or Marine Hospital service, nor to regularly licensed physicians and surgeons in actual consultation from other States and Territories.

5. That after the appointment of the aforesaid medical board, no person not heretofore a practitioner of medicine or surgery within the District of Columbia, shall be allowed to practice within the said district, in either of said branches, without first having obtained a license testified as by this law directed, or the production of a diploma from a respectable medical college or a board of examiners established by law: Provided, that the professors in such college or the examiners in such board be men regularly instructed in medicine and surgery and the collateral branches of medical education, anatomy, chemistry, under the penalty of fifty dollars for each offense, to be recovered in the county court, where he may reside, by bill of presentment and indictment, one-half for the use of the society, and the other for that of the informer.

6. That every person who, upon application, shall be elected a member of the medical society, shall pay a sum not exceeding ten dollars, to be ascertained by the society.

7. That the medical society be, and they are hereby, empowered from time to time to make such by-laws, rules and regulations as they may find requisite, which by-laws, rules and regulations shall, in their application and operation, be exclusively confined to said society, as a society or body corporate, and not to its members individually, when not acting in a corporate character; to break or alter their common seal; to fix the times and places for the meetings of the boards of examiners; filling up vacancies in the medical board; and to do and perform such other things as may be requisite for carrying this act into execution, and which may not be repugnant to the Constitution and laws of the United States: Provided, always, that it shall and may be lawful for any person, resident as aforesaid, and not prohibited as aforesaid, when specially sent for, to come into any part of this district, and administer or prescribe medicine, or perform any operation for the relief of such, to whose assistance he may be sent for; And provided also, that nothing in this act contained shall be so construed as to prevent any person living within or without said district, from administering medicine or performing any surgical operation, with the consent of the person or the attendants of the person to whom such medicine is administered, or upon whom such surgical operation is performed, without fee or reward; nor to prevent the giving advice or assistance to the sick or afflicted, upon charity and kindness; nor to prevent the receipt of reward for the same, if voluntarily tendered or made; nor to extend to midwifery by females; and any person so administering medicine or performing any surgical operation, not authorized to practice physic and surgery according to the provisions of this act, shall be prohibited from collecting any fee or reward for the same by any process at law: And be it further provided, that no person shall be admitted to an examination until he shall produce satisfactory evidence that he has studied physic and surgery three years, including one full course of medical lectures, as usually taught at medical schools, or four years without such a course of lectures.

8. That Congress may at any time alter, amend or annul this act of incorporation of said society at pleasure.

Approved July 7, 1838.

Florida is bounded on the north by Alabama and Georgia, east by the Atlantic ocean, and south and west by the Gulf of Mexico and Alabama. It includes the Peninsula of Florida, and comprises an area of 59,268 square miles, or 37,931,520 acres, of which 46,000 square miles are embraced in the peninsula, which has a uniform width of 100 miles, and extends from 25 degrees to 30 degrees N. latitude. The upper portion extends along the Gulf of Mexico to the River Perdido, a distance of 350 miles from the Atlantic coast line. The principal rivers are the St. John's, Ocklockonnee, Perdido, St. Mary's, Wethlacoochee, Suwannee and the Apalachicola. Numerous lakes and ponds dot the surface of the peninsula. The climate is almost tropical, the average summer temperature being 80 degrees, the winter varying from 65 degrees to 70 degrees, according to location.

The average annual rainfall is 55 inches.

The vegetation is varied, and forests of low saw palmetto, the cabbage palm, the mangrove, red pine, hickory, white oak and gum trees, and groves of wild orange trees, occur in different portions of the state. Deer, bears and panthers abound, also many orders of birds. The hammocks or river bottoms are extremely fertile, and Indian corn and cotton are the staples. Oranges, lemons, limes, pineapples, olives and grapes flourish luxuriantly.

The following table shows increase in population for fifty years:

1840	54,477	1870	187,748
1850	87,455	1880	269,493
1860	140,424	1890	391,422

The educational and religious facilities meet all the wants of the people.

Florida is famous for the number, size and variety of its mineral springs.

Rate of mortality in Florida, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1,000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
319,422	4,145	10.50	2,339	1,806	10.40	10.85

The number of deaths from consumption during 1890 was 577, which was at the rate of .96 per 1,000 of population, or 90.95 per 1,000 of total deaths.

MEDICAL LAWS OF FLORIDA.

801. Appointment of Medical Examiners.—The Governor shall appoint a board of medical examiners in and for each judicial circuit of the state, and he shall appoint one board of homoeopathic medical examiners for the state at large.

802. Qualification of Examiners.—Each circuit board of medical examiners shall be composed of three practicing physicians of known ability, who shall be graduates of some medical college recognized by the American Medical Association, who shall be graduates in good standing of such reputable medical college or university, and who shall be residents of the circuit for which they shall be appointed. Said board of homoeopathic medical examiners shall be composed of three practicing homoeopathic physicians of known ability, who shall be graduates in good standing of some medical college recognized by the American Institute of Homoeopathy.

803. Terms of Office.—The appointment of each member of each of said boards shall continue for four years from the date of such appointment. Whenever a vacancy shall occur on any of said boards the same shall be filled by appointment by the Governor for the unexpired term.

804. To Elect President and Secretary and Make Rules.—Every board shall elect one of their number president and one secretary, and shall adopt all necessary rules for the guidance and control of their meetings.

805. Each board shall meet regularly semi-annually at some central point in their circuit to conduct examinations and grant certificates as herein provided, and they shall give at least one month's public notice of their meeting by publication in at least one newspaper published in the circuit in which such meeting is to be held, and if there be no such newspaper published in the circuit, it shall be posted in three conspicuous places in the circuit: Provided, That the board of homoeopathic medical examiners shall meet, as herein provided, in the city of Jacksonville, to conduct examinations

and grant certificates as hereinafter provided; and they shall give at least one month's public notice of the time and place of their meeting by publication in at least one newspaper published in the state.

806. Examinations.—It shall be the duty of said board of examiners to examine thoroughly every applicant for certificate of qualification to practice medicine in any of its branches or departments, upon the production of his medical diploma from a recognized college, upon the following named subjects: Anatomy, physiology, surgery, gynecology, therapeutics, obstetrics and chemistry, but no preference shall be given to any school of medicine: Provided, That it shall be the duty of the board of homoeopathic medical examiners to examine thoroughly every applicant for certificate of qualification to practice medicine in any of its branches or departments, upon the production of his diploma from a college recognized by the American Institute of Homoeopathy, upon the following named subjects: Anatomy, physiology, surgery, gynecology, materia medica, therapeutics, obstetrics and chemistry; but no preference shall be given to any school of medicine.

807. When the board shall be satisfied as to the qualifications of an applicant, they shall grant to him a certificate to that effect, which certificate shall entitle the person to whom granted to practice medicine in any county when the same shall have been recorded as required by section 809.

808. Two May Grant Certificates—Temporary Certificates.—Any two members of said board may grant a certificate of qualification to an applicant; and any member of said board shall have authority to grant a temporary certificate to an applicant, upon examination, until the next regular meeting of the board, at which time the temporary certificate shall cease to be of force.

809. Record of Certificate.—The certificate provided for in the two preceding sections shall, before the person to whom it is granted shall be entitled to practice by virtue thereof, be recorded in the office of the clerk of the circuit court of the county in which such practitioner may reside or sojourn, in a well-bound book to be kept by the clerk for that purpose, and when so recorded the clerk shall certify thereon under his official seal the fact and date of such record, and shall return such certificate to the person to whom the same was granted, and shall be entitled for such service to collect from the holder of such certificate the legal fee for recording.

810. Examination Fee.—The board shall be entitled to demand and receive from each applicant examined the sum of ten dollars, whether a certificate be granted such applicant or not.

811. Certificates to Former Practitioners.—All practitioners who have been engaged in the practice of medicine, in any of its departments, in this state, prior to May 31, 1889, shall, upon the production of a diploma from a medical college recognized by the American Medical Association, be granted by the board of examiners a certificate of qualification, without further examination and without charge.

812. Provisions not to Apply to Certain Persons.—The provisions of this chapter shall not apply to persons who have heretofore received certificates of qualification and have recorded the same as provided by the laws of this state heretofore existing, nor to females who follow the practice of midwifery, strictly as such. No person, except those described in this section, shall be permitted to practice medicine in any of its branches or departments without first having obtained and recorded a certificate of qualification from some authorized board of medical examiners, as hereinbefore provided.

CAUTION.

Beware of so-called State Medical Directories, copied from our Medical and Surgical Register by irresponsible persons, and palmed off as original publications. This fraud has been perpetrated in various parts of the country, notwithstanding our efforts to prevent it by prosecution under the copyright law.

To avoid being imposed upon, you should ascertain the standing and responsibility of the publisher before signing an order.

Our friends will confer a favor upon us, as well as the medical profession, by promptly giving notice of any such attempted fraud.

GEORGIA.

CAPITAL, ATLANTA.

Population of State, 1,837,353.

(Census of 1890.)

Males	919,925	Native	1,825,216
Females	917,428	Foreign ...	12,137
White	978,357	Chinese	118
Colored	858,815	Indians	63

Number of physicians, 2,021.

Georgia extends from 30 degrees 21 minutes 40 seconds to 35 degrees N. latitude, and from 80 degrees 52 minutes to 85 degrees 35 minutes 38 seconds W. longitude, and is bounded on the north by Tennessee and North Carolina, on the east by South Carolina and the Atlantic Ocean, on the south by Florida, and on the west by Florida and Alabama. It was one of the original 13 States, and comprises an area of 58,000 square miles or 37,120,000 acres. The Blue Ridge and Allegheny Mountains traverse the northwestern portion of the State, and from them there is a gradual slope to the southeast, where is found the great Okeefinokee Swamp. The principal rivers are the Savannah, Altamaha, Ogeechee, Flint and Chattahoochee; the two last uniting, form the Apalachicola, of Florida. Forests of live oak, southern pine, cedar, cypress, magnolia and laurel are numerous and occupy vast areas. The difference between the climate in Northern and Southern Georgia is very marked, the summers in the former region being invigorating and delightful, while in the latter the heat is often very oppressive. At Atlanta the mean annual temperature is 58.36° and at Savannah 67.5°

The following table shows the increase in population for 60 years:

1830.....	516,823	1870.....	1,184,109
1840.....	691,392	1880... ..	1,542,180
1850.....	906,185	1890.....	1,837,353
1860.....	1,057,286		

The medical institutions of Georgia are: The Medical College of Georgia, Augusta; the Atlanta Medical College, Atlanta; the Georgia College of Eclectic Medicine and Surgery, Atlanta, and the Southern Medical College, Atlanta.

There are a number of mineral springs in the State.

Rate of mortality in Georgia, as computed from the United States census of 1890:

Population.	Deaths in 1890.	Rate per 1,000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
1,837,353	21,174	11.25	10,203	10,971	10.43	12.77

The total number of deaths from consumption during 1890 was 2,155, which was at the rate of 1.17 per 1,000 of population, or 101.77 per 1,000 of total deaths.

MEDICAL LAWS OF GEORGIA.

AN ACT TO ESTABLISH BOARDS OF MEDICAL EXAMINERS FOR THE STATE OF GEORGIA, TO DEFINE THEIR DUTIES AND POWERS, TO PROTECT THE PEOPLE FROM ILLEGAL AND UNQUALIFIED PRACTITIONERS OF MEDICINE AND SURGERY, TO REGULATE THE ISSUING AND RECORDING OF LICENSES, TO PRESCRIBE PENALTIES FOR THE VIOLATION OF THIS ACT, AND FOR OTHER PURPOSES.

Section 1. Be it enacted by the General Assembly of Georgia, and it is hereby enacted by authority of the same, that within thirty days after the passage of this act, it shall be the duty of the Governor to appoint for this State three separate boards of medical examiners of five members each, as follows: One board to consist of five members of the regular school of medicine; one board of five members of the eclectic school of medicine; and one board of five members of the homoeopathic school of medicine. The members of each of said boards shall be men learned in medicine and surgery, of good moral and professional character, and graduates of reputable medical colleges; but none of them shall be members of the faculty of any medical college. Each of said three boards shall be wholly independent of, and separate from, the other two in the performance of the duties herein required of each of said boards. A majority of each board shall constitute a quorum.

Sec. 2. Be it further enacted, that the term of office of said members shall be for the term of three years; provided, that two members of each board shall first be appointed for one year; two for two years; and one for three years; and subsequently each appointment shall be for the full term of three years. Any vacancy that may occur in said board, in consequence of death, resignation, removal from the State, or from other cause, shall be filled for the unexpired term by the Governor.

Sec. 3. Be it further enacted, that immediately, and before entering upon the duties of said office, the members of said board of medical examiners shall take the following oath: "I do swear that I will faithfully perform the duties of a member of the board of medical examiners for the State of Georgia to the best of my ability, so help me God," and shall file the same in the office of the Governor of the State, who, upon receiving the said oath of office, shall issue to each examiner a certificate of appointment.

Sec. 4. Be it further enacted, that immediately after the appointment and qualification of said members, each board shall meet and organize. The officers of said board shall be a president, vice-president, and secretary (who shall act as treasurer). Said officers shall be members of and elected by their respective boards. Each board shall hold two regular meetings in each year. One meeting shall be held at such time on or just before graduation day of each medical college now chartered, or that may hereafter be chartered, in this State, and the board of examiners, after consultation with the faculty of said college, shall fix a time for its meeting to suit a majority of the students graduating from said college; the other, on the second Tuesday in October. The first meeting shall be held in the city of Atlanta, and the succeeding meetings of each board may be held in such city as each board may determine for itself. Special meetings may be held upon the call of

the president and two members of each board; but there shall not be less than two regular meetings in each year. Each board may prescribe rules, regulations and by-laws for its proceedings and government, and shall keep permanent record of its actions. And each board shall examine and pass upon the qualifications of applicants for the practice of medicine in the State, as herein prescribed.

Sec. 5. Be it further enacted, that it shall be the duty of each board, at any of its meetings, to examine only persons making application to it, who are graduates of an incorporated medical college, school or university that requires not less than three full courses of study of six months each, who shall desire to commence the practice of medicine or surgery in the State, and who shall not, by the provisions of this act be exempt from such examination; but any person now matriculated as a student of medicine at any medical college, after graduation, and any person from another State who shall have graduated prior to April 1st, 1895, at a lawfully chartered medical college requiring only two full courses of study, shall be eligible for examination and license; provided, always, that the applicant for such examinations shall hold a lawfully conferred diploma from an incorporated medical college which conforms to the system of practice represented by the board to which the application shall be made; unless the applicant desires to practice a different system from that recognized in his diploma, then he shall appear before the board which represents the system that he proposes to practice. But in no event shall an applicant who stands rejected by one of said boards be examined or licensed by either of the other boards. If the applicant desires to practice a system not represented by any of the boards hereby established, he may elect for himself the board before which he will appear for examination. When an applicant shall have passed an examination satisfactory as to proficiency before the board in session, the president thereof shall grant to such applicant a certificate to that effect. A fee of ten dollars shall be paid to such board through such officer or member as it may designate by each applicant before such examination is had. In case an applicant shall fail to pass a satisfactory examination before any board, he shall not be permitted to stand any further examination before any of the boards within the next three months thereafter; nor shall he again have to pay the fee prescribed aforesaid for any subsequent examination; provided, that when in the opinion of the president of any board any applicant has been prevented by good cause from appearing before said board, the president and two members of said board designated by him shall constitute a committee, who shall examine such applicant, and may, if they see fit, grant him a certificate which shall have the same force and effect as though granted by a full board, until the next regular meeting of the board, when, if the applicant fails to appear for examination, said certificate shall be void.

Sec. 6. Be it further enacted, that the fund raised from the fees aforesaid shall be applied by each examining board to the payment of its expenses and to making a reasonable compensation to the president, secretary and members thereof.

Sec. 7. Be it further enacted, that before any person who obtains a certificate from any board, or from a committee of any board, may lawfully practice medicine or surgery in this State, he shall cause the said certificate to be recorded in the office of the clerk of the superior court in the county in which he resides. But if he does not reside in the State of Georgia, he shall cause said certificate to be recorded in any county within this State in which he offers to practice. The certificate shall be recorded by the clerk in a book to be kept for that purpose. It shall be indexed in the name of the person to whom the certificate is granted. The clerk's fee for recording a certificate shall be the same as for recording a deed.

Sec. 8. Be it further enacted, that this act shall take effect from and after the first day of January, 1895, and that it shall be unlawful thereafter for any person to commence the practice of medicine or surgery in this State without complying with the provisions of this act. But nothing in this act shall apply to persons now lawfully engaged in the practice of medicine or surgery in the State of Georgia, to any commissioned medical officer or contract surgeon of the United States army or navy or marine hospital service, in the performance of their duties as such, nor to any physician or surgeon residing in any State or Territory of the United States, or in the District of Columbia, who may be bona fide called in consultation in a special case with a legally qualified physician or surgeon residing in this State; nor shall this act be construed as affecting or changing in any way laws in reference to license tax to be paid by physicians and surgeons; provided, that a non-resident physician or surgeon called in consultation in a special case, as above described, shall not be permitted to engage in continuous practice or consultation in connection with any resident physician or surgeon under any form of contract or agreement, direct or indirect.

Sec. 9. Be it further enacted, that any person shall be regarded as practicing medicine or surgery, within the meaning of this act, who shall

prescribe for the sick or those in need of medical or surgical aid, and shall charge or receive therefor money or other compensation or consideration directly or indirectly; provided, however, that midwives and nurses shall not be regarded as practicing medicine or surgery.

Sec. 10. Be it further enacted, that any person who shall practice medicine or surgery in this State in violation of the provisions of this act shall, upon conviction, be punished as prescribed in section 4310 of the code of the State of Georgia for each offence; and it shall not be lawful for him to recover by action, suit, motion, or warrant any compensation for service which may be claimed to have been rendered by him as such physician or surgeon.

Sec. 11. Be it further enacted, that all laws and parts of laws in conflict with this act be, and the same are, hereby repealed.
 Approved December 12, 1894.

The postoffice address is shown in **Display Type**, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

The postoffice address is shown in **Display Type**, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

IDAHO.

CAPITAL, BOISE CITY.

POPULATION OF STATE, 84,385.

(Census of 1890.)

Males	51,290	Native	66,929
Females	33,095	Foreign	17,456
Whites	82,018	Chinese	2,007
Colored	201	Indians	159

Number of physicians 109.

Idaho extends from 42 degrees to 49 degrees north latitude, and from 111 degrees to 117 degrees west longitude, and is bounded on the north by British Columbia, on the south by Nevada and Utah, on the east by Montana and Wyoming, and on the west by Washington and Oregon. It comprises an area of 86,294 square miles, or 55,228,160 acres. The Bitter Root mountains, a chain of the Rockies, from the northeastern boundary, and their spurs and extensions occupy a considerable portion of its surface.

The rivers of the State are, with the exception of the Bear river, tributaries of the Columbia.

The climate is cool and healthful, the mean annual temperature being 52.46.

Grazing is one of the main industries of Idaho, but all cereals flourish abundantly, the staples being barley, wheat, oats and potatoes.

The State is rich in minerals, gold, silver, copper, iron, lead and coal being mined extensively.

Vast forests of red fir, white pine, white cedar, hemlock, tamarack and larch are interspersed over the surface.

BALL NOZZLE SYRINGE.

—(See page opposite Index to Contents.)—

AMERICAN BALL NOZZLE
CO., 837-847 Broadway,
New York City.

The following table shows increase in population for 20 years:

1870	14,999	1890	84,385
1880	32,610		

There are numerous mineral springs in Idaho, but they have not as yet been used for medicinal purposes. Large quantities of salt are manufactured from the soda springs in the southern portion of the State.

Rate of mortality in Idaho, as computed from the U. S. Census of 1890:

Population.	Deaths in 1890.	Rate per 1000.	White.	Colored.	Rate per 1,000 White.	Rate per 1,000 Colored.
84,385	771	9.14	737	34	8.98	14.36

The number of deaths from consumption during 1890 was 36, which was at the rate of .43 per 1,000 of population, or 46.69 per 1,000 of total deaths.

MEDICAL LAWS OF IDAHO.

*An Act to Prevent the Practice of Medicine and Surgery by Unqualified Persons.

Be it Enacted by the Legislative Assembly of the Territory of Idaho, as follows:

Section 1. No person shall practice medicine or surgery in this Territory who has not received a medical education and a diploma from some regularly chartered medical school, said school to have a bona fide existence at the time when said diploma was granted.

2. Every physician or surgeon, when about to take up his residence in this Territory, or who resides here, shall file for record with the county recorder of the county in which he is about to practice his profession, or where he now practices it, a copy of his diploma, at the same time exhibiting the original or a certificate from the dean of the medical school of which he is a graduate, certifying to his graduation.

3. Every physician or surgeon, when filing a copy of his diploma or certificate of graduation as required by section two of this act, shall be identified as the person named in the papers about to be filed, either by the affidavit of two citizens of the county or by his affidavit taken before a notary public or commissioner of deeds for this Territory, which affidavit shall be filed in the office of the county recorder.

4. Any person practicing medicine or surgery in this Territory without complying with sections one, two and three of this act, shall be guilty of a misdemeanor, and upon conviction shall be punished by a fine of not less than fifty (\$50) dollars, nor more than five hundred (\$500) dollars, or by imprisonment in the county jail for a period of not less than thirty days nor more than six months, or by both fine and imprisonment, for each

and every offense; and any person filing or attempting to file as his own the diploma or certificate of graduation of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as is made and provided by the statutes of this Territory for said offense.

5. It shall be the duty of the police, sheriff or constable to arrest all persons practicing medicine or surgery in this Territory who have not complied with the provisions of this act, and the officer making the arrest shall be entitled to one-half of the fine collected.

6. (Amended 1889.) No portion of this act shall apply to any person who, in an emergency, may prescribe or give advice in medicine or surgery in a township where no physician resides within convenient distance, nor to those who have practiced medicine or surgery in this Territory for a period of ten years next preceding the passage of this act, nor to persons prescribing in their own family, nor to midwifery in places where no physician resides within convenient distance.

7. This act shall go into force sixty days after its passage.

Act in operation since 1887.

*Since these laws were enacted, Idaho has become a State.

CAPITAL, SPRINGFIELD.

POPULATION OF STATE, 3,826,351.

(Census of 1890.)

Males	1,972,308	Native	2,984,004
Females	1,854,043	Foreign	842,347
Whites	3,768,472	Chinese	754
Colored	57,028	Indians	97

Number of physicians 7331.

Illinois extends from 37 degrees 3 minutes to 42 degrees 30 minutes north latitude, and from 87 degrees 30 minutes to 91 degrees 40 minutes west longitude, and is bounded on the north by Wisconsin, on the east by Lake Michigan and the State of Indiana, on the south by the Ohio river, which separates it from Kentucky, and on the west by Iowa and Missouri. It comprises an area of 55,410 square miles, or 35,462,400 acres. The surface is generally level, sloping gently from north and east towards the Mississippi and Ohio rivers. It is, however, by no means an unbroken plain, as the many streams which flow through the State have cut deep beds in the yielding alluvial soil, forming in places precipitous slopes and bluffs. The principal rivers are the Mississippi, which flows along the western border; the Illinois, which intersects the State laterally; Rock river in the north, the Ohio on the southern border, the Kaskaskia, Wabash, Fox, Spoon, Mackinaw, Embarras and Vermillion, besides many smaller streams.

The climate is variable, and is marked by great extremes, the summers being warm and the winters extremely cold. The mean annual temperature is about 52 degrees, that of the summer 75 degrees and of the winter 28 degrees. The climate is generally salubrious, except in the low, swampy bottom-lands, where the settlers are subject to chills and fevers. The average annual rainfall is about 35 inches.

Silver, copper, zinc, freestone, gypsum, marble and coal are the principal mineral treasures of Illinois. The soil is exceedingly fertile, and agriculture is the leading industry.

The following table shows the increase in population for 70 years:

1820	55,162	1860	1,711,951
1830	157,445	1870	2,539,891
1840	476,183	1880	3,077,871
1850	851,470	1890	3,826,351

There are several mineral springs in Illinois.

The following is a list of the medical colleges in the State: Rush Medical College, Chicago; Northwestern University Medical School (Chicago Medical College), Chicago; Hahnemann Medical College, Chicago; Bennett College of Eclectic Medicine and Surgery, Chicago; Woman's Medical College of Chicago, Chicago; Chicago Homoeopathic Medical College, Chicago; College of Physicians and Surgeons of Chicago; Physio-Medical Institute, Chicago; National Medical College, Chicago; the Hering College of Homoeopathy, Chicago; American Medical Missionary College, Chicago; Dunham Medical College, Chicago; Harvard Evening Medical College, Chicago; Harvey Medical College, Chicago; Illinois Medical College, Chicago, and International Medical Mission Institute, Chicago.

MEDICAL LAWS OF ILLINOIS.

AN ACT to Regulate the Practice of Medicine in the State of Illinois. Approved June 16, 1887. In force July 1, 1887.

5. Qualifications for Practice—Diploma—Examination—Certificate of State Board of Health. Section 1. Be it enacted by the People of the State of Illinois, represented in the General Assembly: That no person shall practice medicine in any of its departments in this State unless such person possesses the qualifications required by this act.

If a graduate in medicine, he must present his diploma to the State Board of Health for verification as to its genuineness. If the diploma is found genuine, and from a legally-chartered medical institution in good standing, and if the person named therein be the person claiming and presenting the same, the State Board of Health shall issue a certificate to that effect signed by all the members thereof, and such certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State.

If not a graduate, the person practicing medicine in this State shall present himself before said board and submit himself to such examination as the board may require, and if the examination be satisfactory to the board, the said board shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

6. State Board of Health—Organization, Etc.—Certificates. Section 2. The State Board of Health shall organize within three months after the passage of this act; it shall procure a seal, and shall receive, through its secretary, applications for certificates and examinations; the president and secretary shall have the authority to administer oaths, and the board to take testimony in all matters relating to its duties; it shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally-chartered medical institutions in good standing as may be determined by the board; it shall prepare three forms of certificates, one for persons in possession of such diplomas or licenses, the second for candidates examined and favorably passed on by the board, and a third for persons to whom certificates may be issued as hereinafter provided in section 12 of this act; it shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold its meetings, it shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all its meetings for examination.

Certificates shall be signed by all the members of the board, and the secretary of the board shall receive from the applicant a fee of five (\$5) dollars for each certificate issued to such graduate or licentiate. Graduates or licentiates in midwifery to pay the sum of two (\$2) dollars for each certificate. All such fees for certificates shall be paid by the secretary into the treasury of the board.

7. Verification of Diploma—Affidavit. Section 3. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and seal of such officer, if he have a seal; and any person swearing falsely shall be deemed guilty of perjury, and punished accordingly.

Graduates may present their diplomas and affidavits, as provided in this act, by letter or by proxy, and the State Board of Health shall issue its certificate the same as though the owner was present.

8. Examinations by Board. Section 4. All examinations of persons not graduates or licentiates, shall be made directly by the board, and the certificates given by the board shall authorize the possessor to practice medicine and surgery in the State of Illinois.

9. Certificate to be Recorded. Section 5. Every person holding a certificate from the State Board of Health shall have it recorded in the office of the clerk of the county in which he resides within three months from its date, and the date of recording shall be endorsed thereon. Until such certificate is recorded as herein provided, the holder thereof shall not exercise any of the rights or privileges conferred therein to practice medicine.

Any person removing to another county to practice, shall record the certificate in like manner in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fee for making the record.

10. Book to be Kept. Section 6. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue of the certificate. If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

11. Fees for Examinations. Section 7. The fees for the examination of non-graduates shall be as follows: Twenty (20) dollars for an examination in medicine and surgery; ten (10) dollars for an examination in midwifery only; and said fees shall be paid into the treasury of the board. If an applicant fails to pass said examination, his or her fee shall be returned. Upon successfully passing the examination, the certificate of the board shall be issued to the applicant without further charge.

12. Character of Examination. Section 8. Examinations may be made in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

13. Refusal or Revocation of Certificate. Section 9. The State Board of Health may refuse to issue the certificates provided for in section 2 to individuals guilty of unprofessional or dishonorable conduct, and it may revoke such certificates for like causes. In all cases of refusal or revocation the applicant may appeal to the Governor, who may affirm or overrule the decision of the board, and this decision shall be final.

14. Definition of Practicing Physician. Section 10. Any person shall be regarded as practicing medicine, within the meaning of this act, who shall treat, operate on, or prescribe for any physical ailment of another. But nothing in this act shall be construed to prohibit service in cases of emergency, or the domestic administration of family remedies. And this act shall not apply to commissioned surgeons of the United States Army, Navy or Marine Hospital service in the discharge of their official duties.

15. Itinerant Vendor of Drugs, Etc.—License. Section 11. Any itinerant vendor of any drug, nostrum, ointment or appliance of any kind intended for the treatment of disease or injury, or who shall, by writing, or printing, or any other method, profess to cure or treat disease or deformity by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred (\$100) dollars per month into the treasury of the board, to be collected by the State Board of Health, in the name of the People of the State of Illinois, for the use of said Board of Health. And it shall be lawful for the State Board of Health to issue such license on application made to the State Board of Health, such license to be signed by the president of the board, and attested by the secretary of the board, with the seal of the board.

Any such itinerant vendor who shall vend or sell any such drug, nostrum, ointment or appliance without having a license so to do, shall, if found guilty, be fined in any sum not less than one hundred dollars, and not exceeding two hundred dollars for each offense, to be recovered in an action of debt before any court of competent jurisdiction. But such board may for sufficient cause refuse such license.

16. Penalty for Practicing Without Certificate—Using Another's Diploma. Section 12. Any person practicing medicine or surgery in the State without the certificate issued by this board, in compliance with the provisions of this act, shall for each and every instance of such practice forfeit and pay to the People of the State of Illinois, for the use of said State Board of Health, the sum of one hundred (100) dollars for the first offense, and two hundred (200) dollars for each subsequent offense, the same to be recovered in an action of debt before any court of competent jurisdiction, and any person filing or attempting to file as his own the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction, shall be subject to such fine and imprisonment as are made and provided by the statutes of the State for the crime of forgery.

Provided, that all persons who have been practicing medicine continuously for ten years within the State prior to the taking effect of the act to which this is an amendment, and who have not under said original act, obtained a certificate from the said Board of Health to practice medicine in this State, shall upon proper application to said Board of Health receive such certificate, unless it shall be ascertained and determined by said Board of Health that the person so applying for a certificate is of immoral character, or guilty of unprofessional or dishonorable conduct, in which case said Board of Health may reject such application.

And, provided, that such application for a certificate shall be made within six months after the taking effect of this act, and all persons holding a certificate on account of ten years' practice shall be subject to all the requirements and discipline of this act, and the act to which this is an amendment, in regard to their future conduct in the practice of medicine the same as all other persons holding certificates, and all persons not having applied for or received such certificate within six months after the taking effect of this act, and all persons whose applications have for the causes herein

named been rejected or certificates revoked, shall, if they shall practice medicine, be deemed guilty of practicing in violation of law and shall suffer the penalties herein provided.

17. Judgment Upon Conviction—Appeal. Section 13. Upon conviction of either of the offenses mentioned in this act, the court shall, as a part of the judgment, order that the defendant be committed to the common jail of the county until the fine and costs are paid, and upon failure to pay the same immediately, the defendant shall be committed under said order.

Provided, that either party may appeal in the same time and manner as appeals may be taken in other cases, except that where an appeal is prayed in behalf of the People, no appeal bond shall be required to be filed, whether the appeal be from a justice of the peace, or from the county or circuit court, or from the appellate court. But it shall be sufficient in behalf of the People of the State of Illinois, for the use of the State Board of Health, to pray an appeal, and thereupon appeal may be had without bond or security.

17a. Repeal. All acts and parts of acts inconsistent or in conflict with this act, are hereby repealed.

The postoffice address is shown in Display Type, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

The postoffice address is shown in Display Type, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

SALICYLATE SODIUM. — TRUE.

The Wm. S. Merrell Chemical Co.,
Cincinnati, Sole Manufacturers.

IN POWDER and TABLET FORM.

The distressing gastric disturbance so characteristic of the commercial salicylic acid and its sodium salt will be almost entirely avoided by the use of the preparation in this form, while its convenience will be appreciated by physician and patient alike. Printed matter on application.

The postoffice address is shown in **Display Type**, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

THE "RANDOLPH" Covered-Elastic Abdominal Supporter, COVERED-ELASTIC BANDAGE AND COVERED- ELASTIC UMBILICAL TRUSS.

Patented Nov. 19th, 1895.)

This Supporter is very beneficial for all forms of enlargement of the abdomen, pregnancy, corpulency, tumors, etc., etc. IT IS POROUS, being made of a soft lisle thread, interwoven with protected rubber thread. THE RUBBER THREAD IN THIS SUPPORTER BEING COVERED, makes it superior to any other Supporter of its kind yet produced, and far stronger than Supporters made with unprotected rubber thread and consequently it is more durable.

It can be washed in lukewarm water, and thereby kept clean and inoffensive. Being porous it produces warmth without perspiration. The supporter is also very "light" and weighs but TWO OUNCES.

PRICES.

8 inch Supporters.	\$2.50
10 " "	2.75
12 " "	3.00
8 " " all silk	8.00

This bandage, like our Supporter, is made of a rubber thread and of soft lisle thread of the very best quality. The rubber is covered with soft lisle thread, making a very soft bandage, light and porous and much stronger than any Bandage made of rubber unprotected. With our large experience in manufacturing Elastic Stockings, Abdominal Supporters and Bandages of all kinds, made of silk and thread with rubber, we feel a pride in claiming for the Randolph Elastic Bandage and the Randolph Abdominal Supporter the highest possible standard.

PRICES.

This Truss is made of the same material as our other Bandages, but with a chamois-covered navel button, and makes an excellent umbilical supporter for infants and youths, and in some cases for adults.

PRICES.

Infant's Truss	\$1.25
Youth's Truss	2.00
Adult's Truss	4.00

THREE HIGHEST AWARDS RECEIVED AT WORLD'S COLUMBIAN EXPOSITION.

THE BENNETT COLLEGE

—OF—

ECLECTIC MEDICINE and SURGERY.

Cor. of Ada and Fulton Streets, Chicago.

Bennett College will begin its twenty-ninth Annual Course of Lectures on September 23d and continue eight months.

The opening exercises will be held in Lower Amphitheatre the night before at 8 o'clock.

The College is under the control of the Board of Trustees, which consists of fifteen of the staunchest and truest Eclectics in Cook County. It complies with all the requirements of the various State Boards and is recognized throughout the United States as the foremost exponent of Scientific Medicine and Surgery.

The facilities of the institution for imparting medical and surgical instruction are thorough and complete in all the departments, including ample Hospital, Clinical and Laboratory advantages which are not excelled anywhere. Over 12,000 patients are treated here annually.

With eight members of the faculty on the attending staff at Cook County Hospital as Surgeons, Physicians and Obstetricians, each holding frequent clinics there, and three appointments as Internes—for a term of eighteen months each—in that hospital, to be made from each graduating class and obtained by a competition examination, a most excellent opportunity is offered to each matriculant who wishes to avail himself of such invaluable Hospital practice to strive to secure it by careful and thorough study and preparation.

Special courses are given, and arrangements made for the separate teaching of women students in some of the chairs. Ladies are received on equal terms with men and each class contains quite a number of them.

The postoffice address is shown in **Display Type**, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

The postoffice address is shown in **Display Type**, the name of county in which it is located immediately follows, and then the population of the place. The names of Physicians appear under the postoffice name, the first number (the key to which will be found on pages 101 to 120) indicates the college of graduation, and the last number the year in which diploma was granted.

CAUTION.

Beware of so-called State Medical Directories, copied from our Medical and Surgical Register by irresponsible persons, and palmed off as original publications. This fraud has been perpetrated in various parts of the country, notwithstanding our efforts to prevent it by prosecution under the copyright law.

To avoid being imposed upon, you should ascertain the standing and responsibility of the publisher before signing an order.

Our friends will confer a favor upon us, as well as the medical profession, by promptly giving notice of any such attempted fraud.

A College of Medicine in which all "schools" have united for the purpose of teaching the Science of Medicine. Students may elect to take either or all of the courses: Regular, Homeopathic, Eclectic, or Physio-Medical. The course consists of a graded four years' curriculum so arranged that the student is trained in the fundamental and practical branches of medicine. The instruction consists of Didactic Lectures, Laboratory Work, Clinical Lectures and practical demonstrations.

The requirements for admission are the same as in all first-class colleges. Fees \$100 each year. This includes all extras, graduation fee, hospital tickets, Y. M. C. A. and Library tickets. Graduates of other colleges admitted at lower rates.

The text-books used are the standard of all recognized schools of Medicine.

The Faculty embraces thirty Professors, Demonstrators and Associate Professors.

This College has some of the leading business men of Indianapolis as Trustees. The Advisory Board now includes one member from each state of the Union.

Its professors are men of long experience as teachers in medical college work. The students are most thoroughly trained in all departments of medicine.

MEDICAL LAWS OF INDIANA.

Section 1. Be it Enacted by the General Assembly of the State of Indiana, That it shall be unlawful for any person to practice medicine, surgery or obstetrics in this State without first obtaining a license so to do, as hereinafter provided.

2. Any person desiring to practice medicine, surgery or obstetrics in this State shall procure from the clerk of the Circuit Court of the county wherein he or she desires to practice, a license so to do, which license shall be issued to such person only when he or she shall have complied with the following conditions, to wit: When such applicant shall file with such clerk his or her affidavit, and the affidavits of two freeholders or householders of the county, stating that such applicant has regularly graduated in some reputable medical college, and shall exhibit to such clerk the diploma held by such applicant; or when such applicant shall file with such clerk his or her affidavit stating that he or she has resided and practiced medicine, surgery and obstetrics in this State, continuously, for ten years immediately preceding the date of the taking effect of this act; or when such applicant shall file with such clerk his or her affidavit stating that he or she has resided and practiced medicine, surgery and obstetrics in this State continuously, for three years immediately preceding the date of the taking effect of this act, and had, prior to said date, attended one full course of lectures in some reputable medical college. Such applicant shall pay to such clerk, for such license, the sum of one dollar and fifty cents, and such clerk shall record such license, together with the name of the college in which such applicant graduated and the date of his or her diploma, in a book to be kept for such purpose, and which shall be a public record.

3. Any clerk who shall issue a license to practice medicine, surgery and obstetrics to any person who has not complied with the requirements of Section 2 of this act, shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be fined in any sum not less than twenty-five dollars nor more than one hundred dollars, and such license, or one procured by any false affidavit, shall be deemed and held to be void.

4. Any person who shall practice medicine, surgery or obstetrics in this State, without having first procured from the clerk of the Circuit Court of the county wherein he or she shall so practice, a license, as provided in this act, shall be deemed guilty of a misdemeanor, and upon conviction thereof, shall be fined in any sum not less than ten dollars nor more than two hundred dollars: Provided, That this act shall not be deemed to prohibit women from practicing obstetrics, and such midwives are hereby expressly exempted from its provisions.

5. No cause of action shall lie in favor of any person for services as physician, surgeon or obstetrician, who had not, prior to the rendition of such services, procured a license to practice, as herein provided for, and any person who shall pay any sum of money or deliver any property for any such services to any person who is not so licensed, may recover the same, or the value thereof, in any court of competent jurisdiction in this State.

6. The following shall be the form of this act: The clerks of the Circuit Courts shall appropriately fill up the blanks, and issue the same under the seal of their respective courts, to-wit: The State of Indiana,County, ss: I....., Clerk of the Circuit Court of....., in said State, do hereby certify that.....has complied with the laws of the State of Indiana relating to the practice of medicine, surgery and obstetrics, and is hereby authorized to practice medicine, surgery and obstetrics in said county. Witness my hand and the seal of said court, this.....day of....., 18...., Clerk.

7. This act shall take effect and be in force from and after the first day of September, 1885.

AN ACT to amend sections two and six of an act approved April 11, 1885; approved March 9, 1891.
